

Surface Mount EMI Filters

Surface Mount Pi Filters

S BSP

A range of miniature surface mount pi-filters is available from Syfer Technology. In a size of only 1206, it offers an unbeatable combination of size and performance. With a 1A current rating, the SBSP range is available with working voltages up to 100Vdc. The use of X7R and COG ceramic dielectrics allows capacitance values from 22pF to 150nF, making it suitable for both signal and power lines and ensuring impressive EMI filtering performance up to 1GHz and higher. Ideal for telecoms, power supplies and industrial electronic equipment, the operating temperature range of -55°C to 125°C ensures they are also suitable for mil/aerospace applications.

Insertion loss figures quoted are for filters mounted within a partition, it should be noted that some degradation will occur at higher frequencies for filters which are not fully shielded.

Mounting Information and Soldering Procedures

SM Pi chip filter mounted to board and soldered in identical manner to chip capacitor. Solder connections made to each end (signal lines) and each side band (earth track).
