## ELECTRONICS

## FEATURES:

$\checkmark$ The molded strain relief is directly bonded to the cable jacket for superior strength and durability.
$\checkmark$ Teflon insulation and nickel tarnish resistant outer shells used in the BNC connector provide long life and reliability.
$\checkmark$ Gold plated center contacts assure the most noise free connection possible.
$\checkmark$ The connectors and cable are impedance matched.

## CABLE DESIGNATION \& TYPE:

2249-C: RG58C/U, 50 ohm cable makes it ideal for most test and measurement applications, RF transmission systems and Thinnet LAN applications.
2249-E: RG59B/U, 75 ohm cable assembly for use with broadcast, video, and other signal applications.
2249-K: RG174/U, smaller diameter 50 ohm cable for greater flexibility in tight applications. It is best suited for use in low power situations where small size and flexibility is important.
2249-Y: RG223/U, double shielded 50 ohm cable assembly for superior interference rejection.
