Precautions

To ensure safe sensor operation, please follow these precautions.

■ Wiring

Power Supply Voltage

Make sure that the power supply to the Sensor is within the rated voltage range.

Load Short-Circuiting

Do not short-circuit the load, or the Sensor may be damaged.

■ Operating Environment

Do not use the Sensor in locations with explosive or flammable gas.

■ Settings

Power Reset Time

When the E3Z-B is turned ON, there is a 100 ms delay before operation. If the load and the Sensor are connected to independent power supplies, be sure to turn ON the sensor *before* turning ON the load.

■ Connections

M8 Metal Connector

- Turn off power before disconnecting the sensor.
- Remove the connector cover before connecting or disconnecting the metal connector.
- Secure the connector cover by hand. Do not use any pliers, or the connector may be damaged.
- The proper tightening torque range is between 0.3 and 0.4 N·m.

Polarity

Correct polarity wiring is required to prevent damage to the sensor.

Connection without Load

Do not connect the power supply to the Sensor with no load connected, or the internal elements may explode or burn.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
