Reztore™ ESD Hand Lotion and Reztore™ Clean Hand Lotion

Figure 2. Reztore™ Hand Lotions, 8 oz. bottles

Description

Menda Reztore™ ESD Hand Lotion and Reztore™ Clean Lotion are specially formulated for use in the electronic manufacturing environment. Per ESD Handbook TR20.20 paragraph 5.3.2.4.3 Test Procedure, "If the [wrist strap test] resistance is still too high, dry skin might be the problem. Dry skin conditions can be resolved by applying moisturizing lotion on the wrist and repeating the resistance test again. The moisturizing lotion should be one that is compatible with process requirements." These moisturizing hand lotions can be used to enhance the effectiveness of ESD control wrist straps, particularly for individuals with dry skin. They will absorb immediately into the skin without interfering with grip or dexterity. Both lotions are free of chemicals that may adversely affect solderability or cause corrosion of electronic components.

The Reztore™ Hand Lotions can also be used with ESD footwear. Per ESD Handbook TR20.20 section 5.3.3.5 Common Testing Problems "Occasionally, footwear may indicate a high resistance. Outside of the shoe material itself being a contributor to high resistance, the wearer's skin (if dry), heavy or insulative socks, or the absence of a sweat layer due to differences in temperature between the inner surfaces of the shoes and the wearer's feet.

The Reztore™ Hand Lotions are available as the following item numbers:

	Scented	Unscented
8 oz.	35665	35666
32 oz.	35661	35667
1 gal.	35662	35668

Item 35660 is also available as a case of twelve 8 oz. bottles.

General Guidelines

Reztore™ hand lotion can be applied to hands and wrists to increase the conductivity of the skin and reduce skin dryness. It is not recommended for application to the face. The lotion is chemically and biologically stable and is free of soaps, glycerin, lanolin, free-salts, silicone and mineral oil. Avoid contact with eyes. If eye contact occurs wash with water.

Directions

Apply a small amount of Reztore™ Hand Lotion onto the palm of the hand. Using your hands, rub the lotion into skin areas which are either dry or where increased conductivity is desired, especially on the wrist where the wrist strap will be in direct contact. Gently rub the lotion into the skin until it is absorbed. Remove the excess lotion with a towel.
