

Voltage Regulators with Stand-by Function - Input Voltage: 28V

## ■ GENERAL DESCRIPTION

XC6216/XE6216 series are positive voltage regulator ICs with 28V of operation voltage. The series consists of a voltage reference, an error amplifier, a current limiter, a thermal shutdown circuit and a phase compensation circuit plus a driver transistor.

The output voltage is selectable in 0.1V increments within the range of 2.0V to 12V using laser trimming technologies. With external resistors, the output voltage range can be expanded from 2.0V to 23V. The output stabilization capacitor ( $C_L$ ) is also compatible with low ESR ceramic capacitors.

The over current protection circuit and the thermal shutdown circuit are built-in. These two protection circuits will operate when the output current reaches current limit level or the junction temperature reaches temperature limit level.

The CE function enables the output to be turned off and the IC becomes a stand-by mode resulting in greatly reduced power consumption.

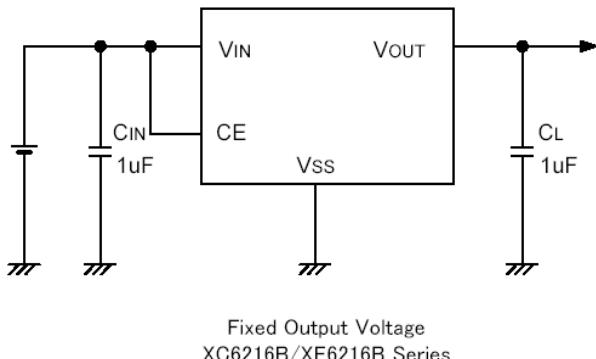

## ■ APPLICATIONS

- Car audio, Car navigation systems
- Note book computers, PDAs
- Home appliances
- Audio visual equipment  
(Cameras, VCRs, etc.)
- Cordless phones,  
Wireless communication equipment

## ■ FEATURES

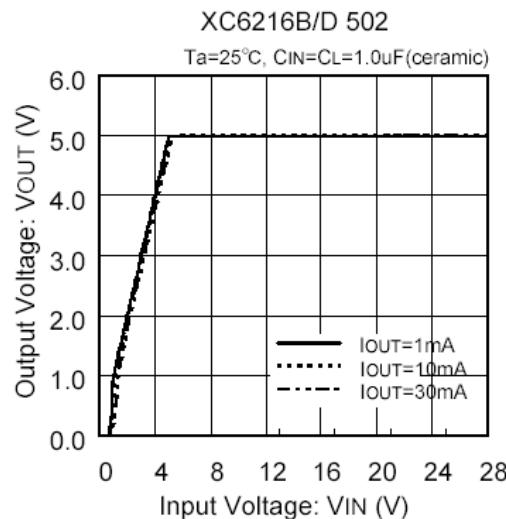

|                                 |  |
|---------------------------------|--|
| <b>Max Output Current</b>       | : More than 150mA (200mA limit)<br>( $V_{IN}=V_{OUT}+3.0V$ )       |
| <b>Dropout Voltage</b>          | : 300mV@ $I_{OUT}=20mA$  |
| <b>Input Voltage Range</b>      | : 2.0V~28.0V   |
| <b>Output Voltage Range</b>     | : 2.0V~12.0V (0.1V increments)<br>2.0V~23V with external resistors |
| <b>Fixed Output Accuracy</b>    | : $\pm 2\%$<br>$\pm 1\%$ optional for XC6216 series                |
| <b>Low Power Consumption</b>    | : $5\mu A$   |
| <b>Stand-by Current</b>         | : Less than $0.1\mu A$   |
| <b>High Ripple Rejection</b>    | : 30dB@1kHz  |
| <b>Operating Temperature</b>    | : $-40^{\circ}C \sim +85^{\circ}C$                                 |
| <b>Low ESR Capacitor</b>        | : Ceramic Capacitor Compatible                                     |
| <b>Built-in Protection</b>      | : Current Limit Circuit<br>Thermal Shutdown Circuit                |
| <b>Packages</b>                 | : SOT-25, SOT-89, SOT-89-5,<br>USP-6C, SOT-223, TO-252             |
| <b>Environmentally Friendly</b> | : EU RoHS Compliant, Pb Free                                       |

## ■ TYPICAL APPLICATION CIRCUIT

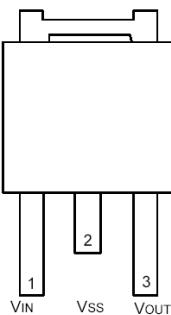

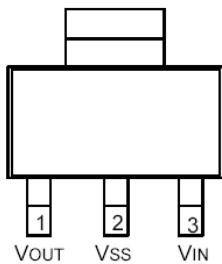

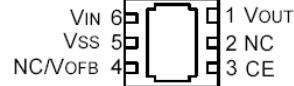

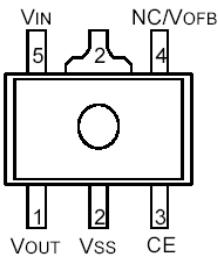

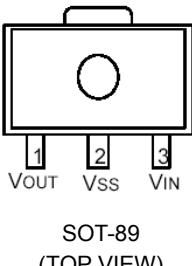

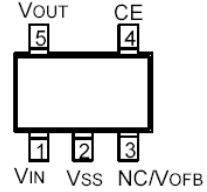

## ■ TYPICAL PERFORMANCE CHARACTERISTICS

- Output Voltage vs. Input Voltage

# XC6216/XE6216 Series

## PIN CONFIGURATION

\* The dissipation pad for the USP-6C package should be solder-plated in recommended mount pattern and metal masking so as to enhance mounting strength and heat release. If the pad needs to be connected to other pins, it should be connected to the Vss (No. 5) pin.

## PIN ASSIGNMENT

### ● XC6216B/XE6216B Series

\*The XE6216B in SOT-25 and USP-6C are under development.

| PIN NUMBER |          |         | PIN NAME | FUNCTIONS      |
|------------|----------|---------|----------|----------------|
| SOT-25*    | SOT-89-5 | USP-6C* |          |                |
| 1          | 5        | 6       | VIN      | Power Input    |
| 2          | 2        | 5       | Vss      | Ground         |
| 3          | 4        | 4       | NC       | No connection  |
| 4          | 3        | 3       | CE       | ON/OFF Control |
| 5          | 1        | 1       | VOUT     | Output         |
| -          | -        | 2       | NC       | No connection  |

### ● XC6216C Series

| PIN NUMBER |          |        | PIN NAME | FUNCTIONS                 |
|------------|----------|--------|----------|---------------------------|
| SOT-25     | SOT-89-5 | USP-6C |          |                           |
| 1          | 5        | 6      | VIN      | Power Input               |
| 2          | 2        | 5      | Vss      | Ground                    |
| 3          | 4        | 4      | VOFB     | Output Voltage Adjustment |
| 4          | 3        | 3      | CE       | ON/OFF Control            |
| 5          | 1        | 1      | VOUT     | Output                    |
| -          | -        | 2      | NC       | No connection             |

### ● XC6216D/XE6216D Series

\*The XE6216D in SOT-89, SOT-223 and TO-252 are under development.

| PIN NUMBER |          |         | PIN NAME | FUNCTIONS   |
|------------|----------|---------|----------|-------------|
| SOT-89*    | SOT-223* | TO-252* |          |             |
| 3          | 3        | 1       | VIN      | Power Input |
| 2          | 2        | 2       | Vss      | Ground      |
| 1          | 1        | 3       | VOUT     | Output      |

## ■ PRODUCT CLASSIFICATION

### ● Ordering Information

XC6216①②③④⑤⑥-⑦ (\*1)

| DESIGNATOR | DESCRIPTION                    | SYMBOL  | DESCRIPTION   |
|------------|--------------------------------|---------|---|
| ①          | Type and Options of Regulators | B       | Fixed output voltage, High Active   |
|            |                                | C       | Output voltage externally set, High Active  |
|            |                                | D       | Fixed output voltage, No CE function  |
| ②③         | Output Voltage                 | 20 ~ C0 | For the voltage within 2.0V ~9.9V (0.1V increments);<br>e.g. 2.5V ⇒ 25<br>5.0V ⇒ 50           |
|            |                                |         | For the voltage above 10.0V (0.1V increments);<br>e.g. 10.6V ⇒ A6<br>11.2V ⇒ B2<br>12.0V ⇒ C0 |
|            |                                | 20      | For C type (output voltage externally set), V <sub>OFB</sub> =2.0V only                       |
| ④          | Output Voltage Accuracy (*2)   | 2       | Within ±2% accuracy   |
|            |                                | 1       | Within ±1% accuracy   |
| ⑤⑥-⑦       | Packages Taping Type (*3)      | MR      | SOT-25 (for B and C types only)   |
|            |                                | MR-G    | SOT-25 (for B and C types only)   |
|            |                                | PR      | SOT-89-5 (for B and C types only)   |
|            |                                | PR      | SOT-89 (for D type only)  |
|            |                                | PR-G    | SOT-89 (for D type only)  |
|            |                                | ER      | USP-6C (for B and C types only)   |
|            |                                | FR      | SOT-223 (for D type only)   |
|            |                                | FR-G    | SOT-223 (for D type only)   |
|            |                                | JR      | TO-252 (for D type only)  |

(\*1) The "-G" suffix indicates that the products are Halogen and Antimony free as well as being fully RoHS compliant.

(\*2) For the C type, the accuracy is based on V<sub>OFB</sub> voltage. The actual output voltage accuracy is depended on the external resistances.

(\*3) The device orientation is fixed in its embossed tape pocket.

For reverse orientation, please contact your local Torex sales office or representative.

(Standard orientation: ⑤R-⑦, Reverse orientation: ⑤L-⑦)

NOTE:

\*1: V<sub>OUT(T)</sub>: Nominal output voltage

\*2: V<sub>OUT(E)</sub>: Effective output voltage

(i.e. the output voltage when "V<sub>OUT(T)</sub>+2.0V" is provided at the V<sub>IN</sub> pin while maintaining a certain I<sub>OUT</sub> value.)

\*3: V<sub>dif</sub>={V<sub>IN1</sub><sup>Note 5)</sup> - V<sub>OUT1</sub><sup>Note 4)</sup>}

\*4: V<sub>OUT1</sub>: V<sub>OUT(T)</sub><3.0V, A voltage equal to 98% of the output voltage whenever an amply stabilized I<sub>OUT</sub>{V<sub>OUT(T)</sub>+3.0V} is input.

V<sub>OUT(T)</sub>≥3.0V, A voltage equal to 98% of the output voltage whenever an amply stabilized I<sub>OUT</sub>{V<sub>OUT(T)</sub>+2.0V} is input.

\*5: V<sub>IN1</sub>: The input voltage when V<sub>OUT1</sub> appears as input voltage is gradually decreased.

\*6: Unless otherwise stated, V<sub>IN</sub>=V<sub>OUT(T)</sub>+2.0V.

NOTE:

\*1: V<sub>OUT(T)</sub>: Nominal output voltage

\*2: V<sub>OUT(E)</sub>: Effective output voltage

(i.e. the output voltage when "V<sub>OUT(T)</sub>+2.0V" is provided at the V<sub>IN</sub> pin while maintaining a certain I<sub>OUT</sub> value.)

\*3: V<sub>dif</sub>={V<sub>IN1</sub><sup>(Note 5)</sup> - V<sub>OUT1</sub><sup>(Note 4)</sup>}

\*4: V<sub>OUT1</sub>: V<sub>OUT(T)</sub><3.0V, A voltage equal to 98% of the output voltage whenever an amply stabilized I<sub>OUT</sub>{V<sub>OUT(T)</sub>+3.0V} is input.

V<sub>OUT(T)</sub>≥3.0V, A voltage equal to 98% of the output voltage whenever an amply stabilized I<sub>OUT</sub>{V<sub>OUT(T)</sub>+2.0V} is input.

\*5: V<sub>IN1</sub>: The input voltage when V<sub>OUT1</sub> appears as input voltage is gradually decreased.

\*6: Unless otherwise stated, V<sub>IN</sub>=V<sub>OUT(T)</sub>+2.0V.

(※) Junction temperature range is T<sub>j</sub>=-40~125°C for this table.

## ■ OPERATIONAL EXPLANATION

### <Output Voltage Control>

The voltage divided by resistors R11 & R12 is compared with the internal reference voltage by the error amplifier. The P-channel MOSFET which is connected to the VOUT pin is then driven by the subsequent output signal. The output voltage at the VOUT pin is controlled and stabilized by a system of negative feedback. The current limit circuit and short protect circuit operate in relation to the level of output current and heat dissipation. Further, the IC's internal circuitry can be shutdown via the CE pin's signal.

### <Short-Circuit Protection>

The XC6216/XE6216 series includes a current fold-back circuit as a short circuit protection. When the load current reaches the current limit level, the current fold-back circuit operates and output voltage drops. The output voltage drops further and output current decreases. When the output pin is shorted, a current of about 30mA flows.

### <CE Pin>

The IC's internal circuitry can be shutdown via the signal from the CE pin with the XC6216/XE6216 series. In shutdown mode, output at the Vout pin will be pulled down by R11 and R12 to the Vss level. Note that as the XC6216/XE6216 series is 'High Active/No pull down', operations will become unstable with the CE pin open. We suggest that you use this IC with either a VIN voltage or a Vss voltage input at the CE pin. If this IC is used with the correct specifications for the CE pin, the operational logic is fixed and the IC will operate normally. However, supply current may increase as a result of through current in the IC's internal circuitry if a medium voltage is applied.

### <Thermal Shutdown>

When the junction temperature of the built-in driver transistor reaches the temperature limit level (150°C TYP.), the thermal shutdown circuit operates and the driver transistor will be set to OFF. The IC resumes its operation when the thermal shutdown function is released and the IC's operation is automatically restored because the junction temperature drops to the level of the thermal shutdown release voltage.

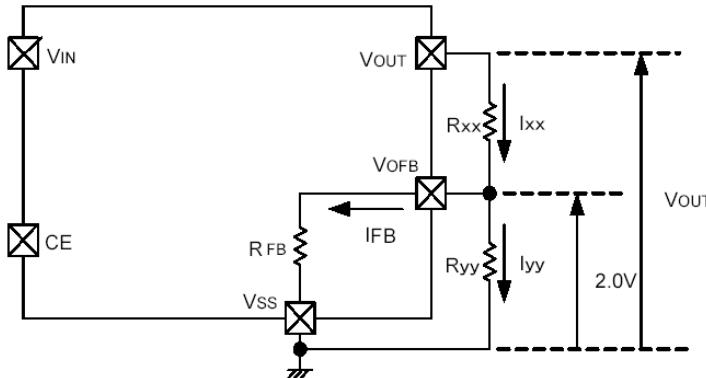

### <Minimum Operating Voltage>

For the stable operation of the IC, over 2.0V of input voltage is necessary. The output voltage may not be generated normally if the input voltage is less than 2.0V.

## ■ NOTES ON USE

1. Please use this IC within the stated absolute maximum ratings. The IC is liable to malfunction should the ratings be exceeded.
  2. Where wiring impedance is high, operations may become unstable due to the noise and/or phase lag depending on output current. Please strengthen  $V_{IN}$  and  $V_{SS}$  wiring in particular.
  3. Phase compensation inside the IC is performed in the XC6216/XE6216 series. Therefore, an abnormal oscillation does not occur even if there is no output capacitor  $C_L$ . An input capacitor  $C_{IN}$  around  $0.1\mu F \sim 1.0\mu F$  between the  $V_{IN}$  pin and the  $V_{SS}$  pin is required for input stability. Also, the output voltage fluctuation such as under shoot or over shoot, which occurs because of the load change can be controlled by placing the output capacitor  $C_L$  around  $0.1\mu F \sim 1.0\mu F$  between the  $V_{OUT}$  pin and  $V_{SS}$  pin. The input capacitor ( $C_{IN}$ ) and the output capacitor ( $C_L$ ) should be placed to the IC as close as possible with a shorter wiring.
  4. Notes on Setting Output Voltage Externally (C type)  $T_a=25^\circ C$

- #### 4. Notes on Setting Output Voltage Externally (C type) $T_a=25^\circ\text{C}$

The output voltage can be set externally by the following equation:

$$l_{21} = l_{FB} + l_{22} \quad \dots \dots \dots \quad (1)$$

$$l_{22}=2.0VR_{22} \quad \dots \quad (2)$$

$$I_{21} = I_{FB} + 2.0V/R_{22}$$

If the equation (3) is assigned to the equation (2), the equation becomes as below:

$$V_{OUT}=2.0V+R_{21} \cdot I_{21} \quad \dots \quad (3)$$

For this, the following equation can be used for setting output voltage externally:

$$V_{OUT}=2.0V+R_{21} \cdot I_{21} \quad \dots \quad (4)$$

ion (4) will be;  $\Delta \Delta' \left( \text{P}_{\text{ex}} - \text{P}_{\text{in}} \right) = 0.3 \text{V}(\text{P}_{\text{ex}})$

$$V_{OUT} = 2.0V + R_{21} \cdot (I_{FB} + 2.0V/R_{22})$$

The second term of the equation (6),  $R_{21} \cdot I_{FB}$ , is the leakage current calculated by the following equation:

$$I = 2 \cdot \Delta V / R \quad (2)$$

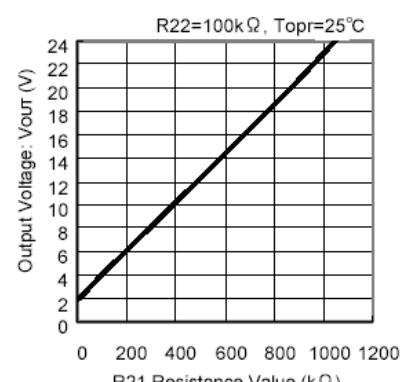

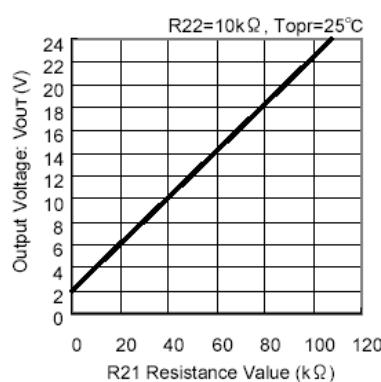

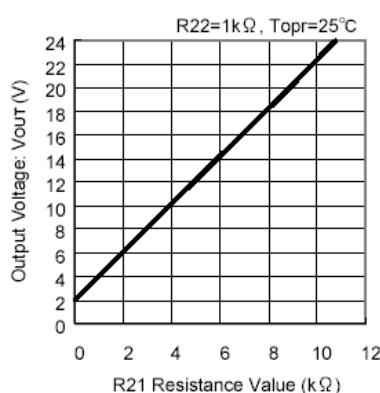

The cause of the output accuracy error,  $R_{out} - R_s$ , can be calculated by the equation below.

The output accuracy error,  $R_{21} \cdot F_B$  can be calculated by the equation below,

$$B = R_{21} \cdot Z \cdot U/V \cdot R_{FB} - 2 \cdot V \cdot P_{in} / (P_{in} +$$

Accordingly, if  $R_{\text{V}} \ll R_{\text{FB}}$ , the output voltage error becomes minute.

- SOT-25 Power Dissipation

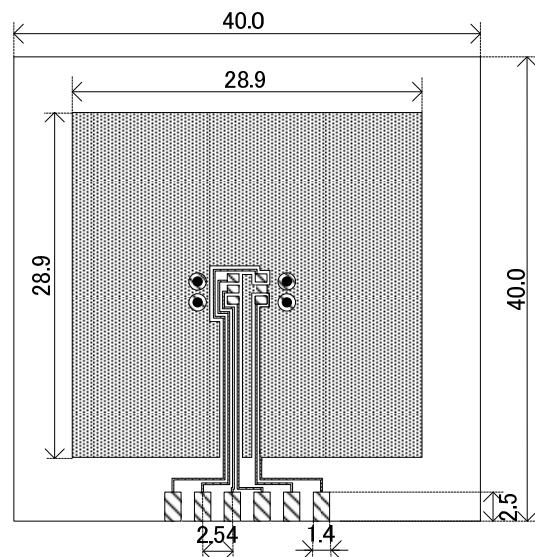

Power dissipation data for the SOT-25 is shown in this page.

The value of power dissipation varies with the mount board conditions.

Please use this data as one of reference data taken in the described condition.

1. Measurement Condition (Reference data)

Condition: Mount on a board  
 Ambient: Natural convection  
 Soldering: Lead (Pb) free  
 Board: Dimensions 40 x 40 mm (1600 mm<sup>2</sup> in one side)  
 Copper (Cu) traces occupy 50% of the board area  
 In top and back faces  
 Package heat-sink is tied to the copper traces  
 (Board of SOT-26 is used.)  
 Material: Glass Epoxy (FR-4)  
 Thickness: 1.6 mm  
 Through-hole: 4 x 0.8 Diameter

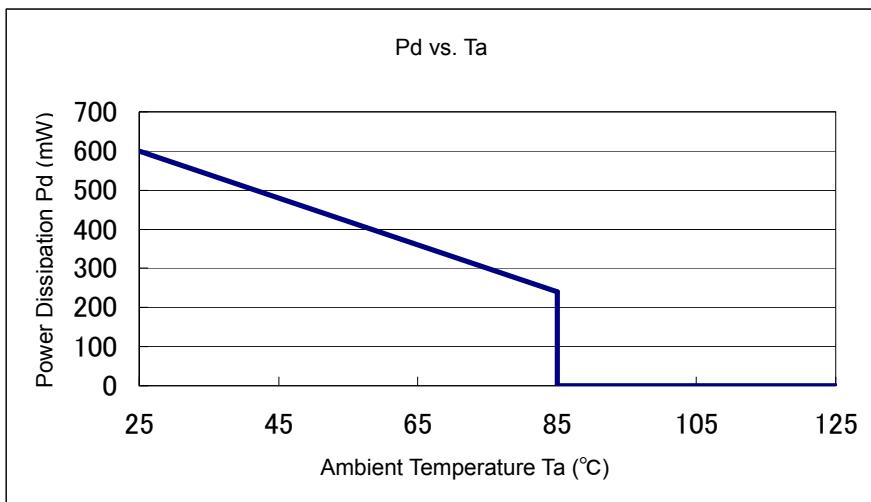

Evaluation Board (Unit: mm)

2. Power Dissipation vs. Ambient temperature

Board Mount ( $T_j$  max = 125°C)

| Ambient Temperature (°C) | Power Dissipation $P_d$ (mW) | Thermal Resistance (°C/W) |
|--------------------------|------------------------------|---------------------------|
| 25                       | 600                          | 166.67                    |
| 85                       | 240                          |                           |

- SOT-89-5 Power Dissipation

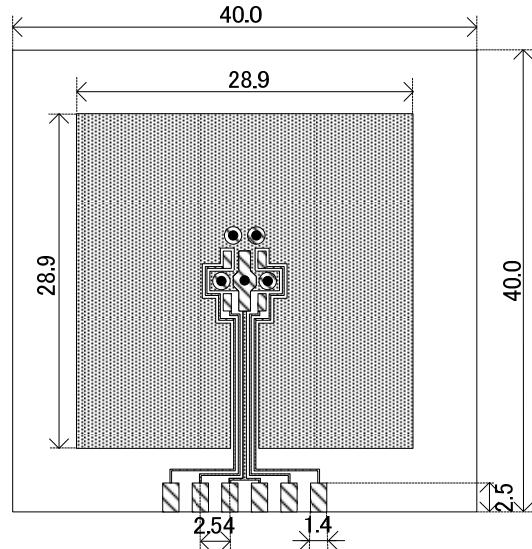

Power dissipation data for the SOT-89-5 is shown in this page.

The value of power dissipation varies with the mount board conditions.

Please use this data as one of reference data taken in the described condition.

1. Measurement Condition (Reference data)

Condition: Mount on a board  
 Ambient: Natural convection  
 Soldering: Lead (Pb) free  
 Board: Dimensions 40 x 40 mm (1600 mm<sup>2</sup> in one side)  
 Copper (Cu) traces occupy 50% of the board area  
 In top and back faces  
 Package heat-sink is tied to the copper traces  
 Material: Glass Epoxy (FR-4)  
 Thickness: 1.6 mm  
 Through-hole: 5 x 0.8 Diameter

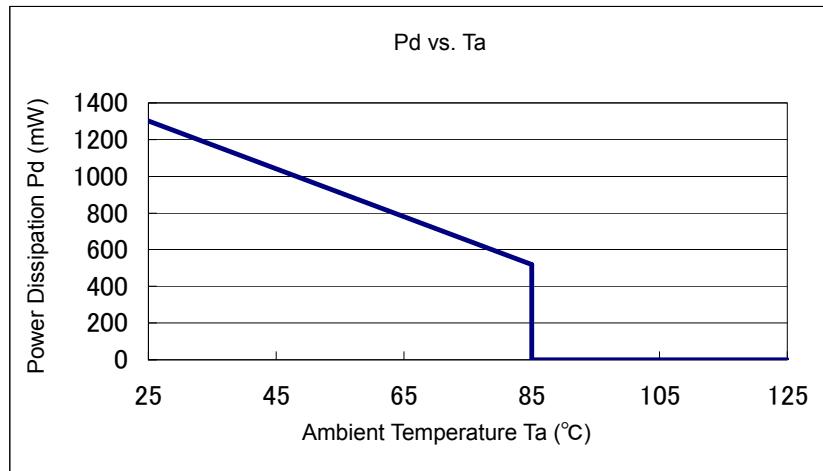

Evaluation Board (Unit: mm)

2. Power Dissipation vs. Ambient temperature

Board Mount ( $T_j$  max = 125°C)

| Ambient Temperature (°C) | Power Dissipation $P_d$ (mW) | Thermal Resistance (°C/W) |
|--------------------------|------------------------------|---------------------------|
| 25                       | 1300                         | 76.92                     |
| 85                       | 520                          |                           |

## ■PACKAGING INFORMATION (Continued)

### ● USP-6C Power Dissipation

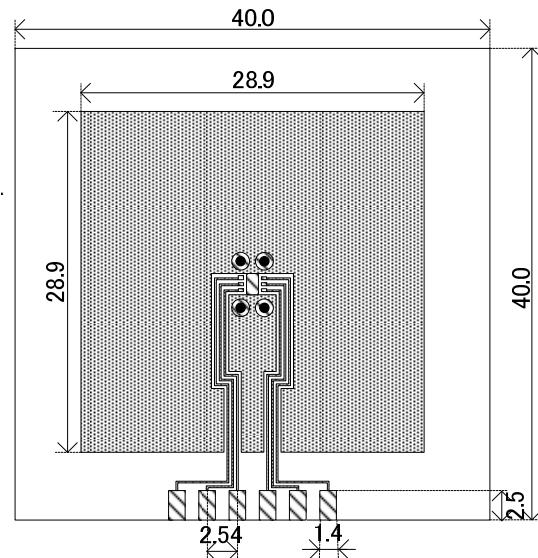

Power dissipation data for the USP-6C is shown in this page.

The value of power dissipation varies with the mount board conditions.

Please use this data as one of reference data taken in the described condition.

#### 1. Measurement Condition (Reference data)

Condition: Mount on a board  
 Ambient: Natural convection  
 Soldering: Lead (Pb) free

| A    | -          | 4.1 | 7.1 | 10.1 | 12.0 | U    | 2.6        | 5.6 | 8.6 | 11.6 |
| B    | -          | 4.2 | 7.2 | 10.2 | 12.0 | V    | 2.7        | 5.7 | 8.7 | 11.7 |
| C    | -          | 4.3 | 7.3 | 10.3 | 12.0 | X    | 2.8        | 5.8 | 8.8 | 11.8 |
| D    | -          | 4.4 | 7.4 | 10.4 | 12.0 | Y    | 2.9        | 5.9 | 8.9 | 11.9 |
| E    | -          | 4.5 | 7.5 | 10.5 | 12.0 | Z    | 3.0        | 6.0 | 9.0 | 12.0 |

④⑤ represents assembly lot number

01, ···, 09, 10, 11, ···, 99, 0A, ···, 0Z, 1A, ··· repeated (G, I, J, O, Q, W excluded)

Note: No character inversion used.

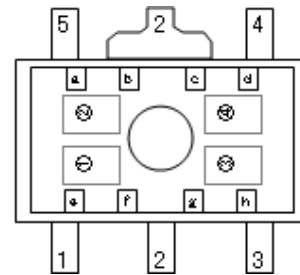

# XC6216/XE6216 Series

## ■ MARKING RULE (XE6216 Series)

### ● SOT-89-5

① represents the product number

| MARK | PRODUCT SERIES |
|------|----------------|
| 2    | XE6216xxxxxx   |

SOT-89-5

② represents the voltage range

| MARK | VOLTAGE (V) | PRODUCT SERIES |
|------|-------------|----------------|
| 0    | 2.0~3.0     | XE6216Bxxxx    |
| 1    | 3.1~6.0     |                |
| 2    | 6.1~9.0     |                |
| 3    | 9.1~12.0    |                |

③ represents the output voltage

| MARK | VOLTAGE(V) |     |     |      | MARK | VOLTAGE(V) |     |     |      |
|------|------------|-----|-----|------|------|------------|-----|-----|------|
|      | 0          | 1   | 2   | 3    |      | F          | H   | K   | L    |
| 0    | -          | 3.1 | 6.1 | 9.1  | F    | -          | 4.6 | 7.6 | 10.6 |
| 1    | -          | 3.2 | 6.2 | 9.2  | H    | -          | 4.7 | 7.7 | 10.7 |
| 2    | -          | 3.3 | 6.3 | 9.3  | K    | -          | 4.8 | 7.8 | 10.8 |
| 3    | -          | 3.4 | 6.4 | 9.4  | L    | -          | 4.9 | 7.9 | 10.9 |
| 4    | -          | 3.5 | 6.5 | 9.5  | M    | 2.0        | 5.0 | 8.0 | 11.0 |
| 5    | -          | 3.6 | 6.6 | 9.6  | N    | 2.1        | 5.1 | 8.1 | 11.1 |
| 6    | -          | 3.7 | 6.7 | 9.7  | P    | 2.2        | 5.2 | 8.2 | 11.2 |
| 7    | -          | 3.8 | 6.8 | 9.8  | R    | 2.3        | 5.3 | 8.3 | 11.3 |
| 8    | -          | 3.9 | 6.9 | 9.9  | S    | 2.4        | 5.4 | 8.4 | 11.4 |
| 9    | -          | 4.0 | 7.0 | 10.0 | T    | 2.5        | 5.5 | 8.5 | 11.5 |
| A    | -          | 4.1 | 7.1 | 10.1 | U    | 2.6        | 5.6 | 8.6 | 11.6 |
| B    | -          | 4.2 | 7.2 | 10.2 | V    | 2.7        | 5.7 | 8.7 | 11.7 |
| C    | -          | 4.3 | 7.3 | 10.3 | X    | 2.8        | 5.8 | 8.8 | 11.8 |
| D    | -          | 4.4 | 7.4 | 10.4 | Y    | 2.9        | 5.9 | 8.9 | 11.9 |
| E    | -          | 4.5 | 7.5 | 10.5 | Z    | 3.0        | 6.0 | 9.0 | 12.0 |

④ represents assembly lot number

0, ..., 9, A, B, ..., Z, 0, ..., 9, A, B, ..., 0, ... repeated (G, I, J, O, Q, W excluded)

Bar marking of a-b-c-d combination represents production year.

| Production Year | a | b | c | d |
|-----------------|---|---|---|---|
| xxx0            | □ | - | - | - |
| xxx1            | - | □ | - | - |
| xxx2            | - | - | □ | - |
| xxx3            | - | - | - | □ |
| xxx4            | □ | □ | - | - |
| xxx5            | □ | - | □ | - |
| xxx6            | □ | - | - | □ |
| xxx7            | - | □ | □ | - |
| xxx8            | - | □ | - | □ |
| xxx9            | - | - | □ | □ |

Bar marking of e-f-g-h combination represents production month.

| Production Month | e | f | g | h |
|------------------|---|---|---|---|
| January          | □ | - | - | - |
| February         | - | □ | - | - |
| March            | - | - | □ | - |
| April            | - | - | - | □ |
| May              | □ | □ | - | - |
| June             | □ | - | □ | - |
| July             | □ | - | - | □ |
| August           | - | □ | □ | - |
| September        | - | □ | - | □ |
| October          | - | - | □ | □ |
| November         | □ | □ | □ | - |
| December         | □ | □ | - | □ |

1. The products and product specifications contained herein are subject to change without notice to improve performance characteristics. Consult us, or our representatives before use, to confirm that the information in this datasheet is up to date.
2. We assume no responsibility for any infringement of patents, patent rights, or other rights arising from the use of any information and circuitry in this datasheet.
3. Please ensure suitable shipping controls (including fail-safe designs and aging protection) are in force for equipment employing products listed in this datasheet.
4. The products in this datasheet are not developed, designed, or approved for use with such equipment whose failure of malfunction can be reasonably expected to directly endanger the life of, or cause significant injury to, the user.  
(e.g. Atomic energy; aerospace; transport; combustion and associated safety equipment thereof.)
5. Please use the products listed in this datasheet within the specified ranges.  
Should you wish to use the products under conditions exceeding the specifications, please consult us or our representatives.
6. We assume no responsibility for damage or loss due to abnormal use.
7. All rights reserved. No part of this datasheet may be copied or reproduced without the prior permission of TOREX SEMICONDUCTOR LTD.
