Contact specification

F 58 - Electrical life (AC) v contact current
2 & 3 pole relays

F 58 - Electrical life (AC) v contact current
4 pole relay

H 58 - Maximum DC1 breaking capacity

- When switching a resistive load (DC1) having voltage and current values under the curve, an electrical life of $\geq 100 \cdot 10^3$ can be expected.
- In the case of DC13 loads, the connection of a diode in parallel with the load will permit a similar electrical life as for a DC1 load.
Note: the release time for the load will be increased.
