Non-Programmable Plug-in On Delay, Interval & Flasher

- u Each unit has a single timing range
- u Choose from 11 separate timing ranges from 0.02 Seconds to 2 Hours
- Uses industry-standard 8 pin octal sockets
- u 10A DPDT output contacts

- All Dual Knob units have independently selectable & adjustable ON & OFF times. To order a Dual Knob unit with the <u>same ON & OFF timing ranges</u>, complete the Product Number by adding one two-digit code from the table below, i.e., a TR-55122-08 is a Repeat Cycle unit with both the ON time & OFF time adjustable between 0.6 60 seconds. To order a Dual Knob unit with <u>different ON & OFF timing ranges</u>, complete the Product Number by adding two different two-digit codes from the table below. The first suffix indicates the first timing range of the unit and the second suffix indicates the second timing range, i.e., a TR-53122-05-12 is a Repeat Cycle unit with an OFF timing range first of 0.1-10 seconds and an ON timing range second of 3-300 seconds.
- n See Pages 52 & 53 for definitions & explanations of Timing Functions.

Mechanical: 10,000,000 operations Full Load: 100,000 operations

Compatibility:

On all units triggered by input voltage or by a control switch, do not use a solid state switch to initiate the timing sequenceproblems with leakage current could occur. On all units with a power trigger, do not use a solid state switch with leakage current exceeding 0.5ma. Contact Macromatic Controls for additional information.

Triggering Off Delay, Single Shot or Watchdog Units:

Timing sequence must be initiated only after input voltage is applied to unit. Minimum required trigger switch closure time is 0.1 seconds.

Approvals:
