

6289 Stainless Steel Footswitch

6289 Stainless Steel Footswitch

This is a stainless steel version of the classic 6289 footswitch. This model is waterproof and offers even greater durability in wet and challenging environments. It comes with a single pole normally open contact rated to 3A 250 Vac and supplied with 2 metres of cable. This model is well suited to a range of medical applications, for controlling medical devices, an example would be the field of urology. Other applications include food processing and marine industries where corrosion is typically a problem.

- ❖ Electrical Rating 3A 250Vac
- ❖ Single Pole Normally Open Contact
- ❖ 2 Metres of Cable
- ❖ Waterproof to IPX7 (IPX8 available on request)
