Product Information

General notes
The 12 or 16 key S.series keypads are specially designed for public environment applications, such as vending machines, ticket machines, payment terminals, telephones, access control systems and industrial machinery.
Keys and housing are built from chrome plated zinc alloy (Zamak). The S.series therefore has high resistance to impact and vandalism and is also sealed to IP 67.

Mounting
The keypad may be mounted from either the front or rear of a panel.
Front mounted keypads require a small cutout for the pin header connector on the back side of the S.series.
Rear mounted keypads are mounted through a rectangular cutout.
To ensure IP 67 sealing a gasket is supplied with the keypad and this is suitable for both forms of mounting.

Contacts
To ensure integrity of contacts and lower switch ratings, the contacts are gilded and external connection to the keypad is by means of a pin header on the back.
The electrical keypad circuit can be supplied in a choice of either matrix or common point configuration.

Keys
The metal anti pull-off keys are highly resistant to shock and fire.

Marking
Non-illuminated keys are engraved with the characters filled in black.
Custom markings or symbols in different colours are available on request.
Illuminated keys are moulded with characters that are cutout then filled with a clear resistant resin for clear illumination.
Illumination
On illuminated versions the keys are individually lit with yellow or blue LED's which them especially suitable in poorly lit locations. Other LED colours are available on request.

Keypad

Material

Keys
Zamak 5 with chrome finish

Housing
Zamak 5 with chrome finish

Back plate
Steel chromated

Contacts
Carbon pill
Carbon on Cu tracks

Mechanical characteristics

Actuating force
1 N ... 3 N

Actuating travel
1.3 mm ±0.3 mm

Rebound time
≤40 ms

Electrical characteristics

Operating voltage/-current
Nominal 5 V, 5 mA
Maximum voltage 24 V
Minimum voltage 0.5 V
Minimum current 0.1 mA

Illumination
Current consumption for single LED :
20 mA at 2.1 V (yellow and green)
20 mA at 1.9 V (red)
10 mA at 3.4 V (blue)

Isolation resistance
≥1000 MΩ at 100 VDC

Contact resistance
≤200 Ω

Electrical life
4 Million cycles of operation per key

Electrostatic breakdown value
5 kV

Electric strength
1500 V_{rms}, 50 Hz, 1 min., as per EN IEC 60512-2

Environmental conditions

Storage temperature
-30 °C ... +85 °C

Operating temperature
-25°C ... +85°C

Front protection
IP 67 as per IEC 60529, when mounted

Climate resistance
as per EN IEC 60512-6
Damp heat : 21 days
Dry heat : 10 days, +85 °C
Saline mist : 96 hours

Impact resistance
IK10 (20 J)
