PNOZsigma - Base units

Safe monitoring of E-STOP, safety gate, light grid and two-hand control

Picture shows similar item

PNOZ s6.1 24VDC 3 n/o 1 n/c
Order numbers: 750126

- Type: **PNOZ s6.1**
- Application options: **Two-hand monitoring type III A**
- Category in accordance with: **EN 954-1**
- SIL value: --
- Standards: **EN 954-1 , VDE 0113-1 , EN 574 TYPE III A , EN 60204-1 , EN 62061**
- Approvals: **BG , CCC , UL/cUL**
- Operating modes: **Detection of shorts across contacts , Dual-channel**
- Selectable times: --
- Number of instantaneous safety contacts: **3**
- Number of delayed safety contacts: --
- Number of auxiliary contacts: **1**
- Number of delayed auxiliary contacts: --
- Number of semiconductor outputs: **1**
- Stop category: **0**
- Supply voltage [V]: **24**
- Supply voltage range: --
- Supply voltage type: **DC**
- Max. current at DC1: **8,0 A**
- Power consumption AC: --
- Power consumption DC: --
- Height dimension: **98,0 mm**
- Width dimension: **22,5 mm**
- Depth dimension: **120,0 mm**
- Height dimension (inches): **3.86"**
- Width dimension (inches): **0.89"**
- Depth dimension (inches): **4.72"**
- Gross weight: **250 g**
- Net weight: **190 g**
- Ambient temperature in °C: **-10 - 55 °C**
- Terminal type: **Screw terminal**
- Terminal style: **Plug-in**
- Order number: **750126**

Two-hand control device for safety circuits

Approvals

| PNOZ s6.1 | |
|-----------|---|
| | ◆ |
| | ◆ |
| | ◆ |

Unit features

- ▶ Positive-guided relay outputs:
 - 3 safety contacts (N/O), instantaneous
 - 1 auxiliary contact (N/C), instantaneous
- ▶ 1 semiconductor output
- ▶ Connection options for:
 - 2 operator elements (buttons)
- ▶ A connector can be used to connect 1 PNOZsigma contact expander module
- ▶ LED indicator for:
 - Supply voltage
 - Input status, channel 1
 - Input status, channel 2
 - Switch status, safety contacts
 - Feedback loop
 - Fault
- ▶ Plug-in connection terminals (either spring-loaded terminal or screw terminal)
- ▶ See order reference for unit types

Unit description

The two-hand control relay meets the requirements of EN 574 Type IIIA. It

forces the operator to keep his hands outside the danger zone area during the hazardous movement. It is designed for use in two-hand circuits.

CAUTION!

The two-hand control relay may **not** be used on **press controllers**. It is only suitable for use where the risk analysis has established a low level of risk (e.g. EN 954-1 Cat. 1).

Safety features

The two-hand control relay meets the following safety requirements:

- ▶ The two-hand control relay prevents the plant from being enabled in the following cases:
 - Power supply failure
 - Component failure
 - Short circuit on an input circuit
 - Coil defect
 - Open circuit
 - Earth fault
- ▶ In each on-off cycle, the output relays on the safety device are tested to ensure they open and close correctly

Block diagram

*only with UB = 48 – 240 VAC/DC

Two-hand relays

Up to PL e of EN ISO 13849-1 PNOZ s6.1

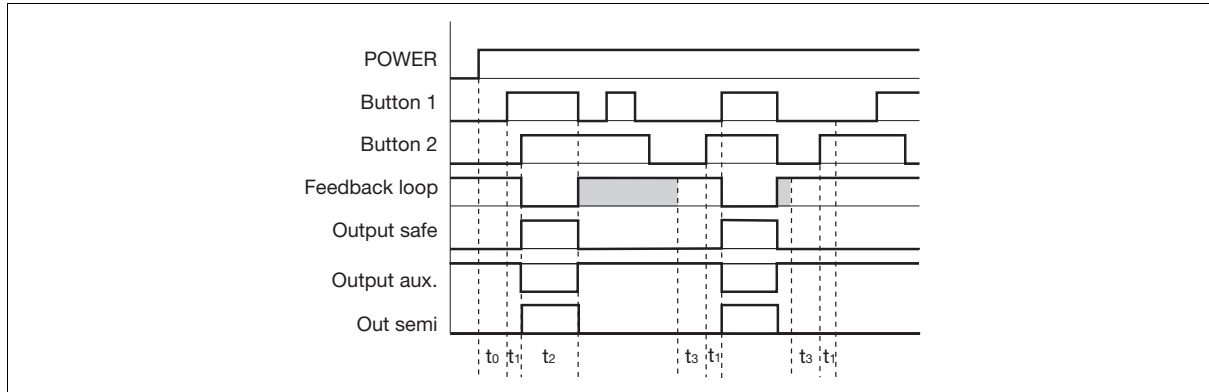

Function description

- ▶ The two-hand control relay must be activated by simultaneously press-

ing two buttons within **0.5 s**. If one or both of the buttons are released, the unit interrupts the control command for the hazardous movement.

- ▶ Reactivation: The output relays will not re-energise until both operator elements have been released and then re-operated simultaneously.

Timing diagram

Key

- ▶ POWER: Supply voltage
 - ▶ Button 1/Button 2: Input circuits S13-S14, S23-S24
 - ▶ Feedback loop: Feedback loop S34
 - ▶ Output safe: Safety outputs 13-14, 23-24, 33-34
 - ▶ Output aux.: Auxiliary contacts 41-42
 - ▶ Out semi: Semiconductor output switch status Y32
 - ▶ t_0 : Recovery time after power on
 - ▶ t_1 : Simultaneity, channel 1 and 2
 - ▶ t_2 : Operating cycle ended through button 1 or 2
 - ▶ t_3 : S34-S12 must be closed before the button is operated (recovery time)
- Shaded area: Status irrelevant

Wiring

Please note:

- ▶ Information given in the “Technical details” must be followed.
- ▶ Outputs 13-14, 23-24, 33-34 are safety contacts, output 41-42 is an auxiliary contact (e.g. for display).
- ▶ To prevent contact welding, a fuse should be connected before the output contacts (see technical details).
- ▶ Calculation of the max. cable runs I_{max} in the input circuit:

$$I_{max} = \frac{R_{lmax}}{R_l / km}$$

R_{lmax} = max. overall cable resistance (see technical details)
 R_l / km = cable resistance/km

- ▶ Use copper wire that can withstand 60/75 °C.
- ▶ Sufficient fuse protection must be provided on all output contacts with capacitive and inductive loads.

Terminal configuration

Installation

Install base unit without contact expander module:

- ▶ Ensure that the plug terminator is inserted at the side of the unit.

Connect base unit and PNOZsigma contact expander module:

- ▶ Remove the plug terminator at the side of the base unit and at the contact expander module.
- ▶ Connect the base unit and the contact expander module to the supplied connector before mounting the units to the DIN rail.

Installation in control cabinet

- ▶ The safety relay should be installed in a control cabinet with a protection type of at least IP54.
- ▶ Use the notch on the rear of the unit to attach it to a DIN rail.
- ▶ Ensure the unit is mounted securely on a vertical DIN rail (35 mm) by using a fixing element (e.g. retaining bracket or an end angle).
- ▶ Push the unit upwards or downwards before lifting it from the DIN rail.

Dimensions

*with spring-loaded terminals
