CX-400 SERIES Ver.2

World Standard

Upgraded to Increase Usability

Achieving low power consumption and high noise-resistance

The world standard CX-400 series Sensors that are environmentally and user friendly.

The total lineup of 148 models covers through the inclusion of a newly developed custom integrated circuit. This **CX-400** series upgrade achieves a significantly higher reliability in the same package as the older model.

Providing stable detection with low power consumption
Includes an analog CMOS
processor ASIC

Strong

**Demonstrating stable detection,
even in harsh environments**

The **CX-400** series incorporates an acrylic that strongly resists oils and coolant fluids, and a polycarbonate indicator cover that strongly resists ethanol. The **CX-400** series is also characterized by strong resistance to noise, reciprocal interference and cold environments.

Resistant to oil and coolant liquids CX-41□/42□/49□

The lens material is made of a strong acrylic that resists the harmful effects of coolants. These sensors can be used with confidence even around metal processing machine that disperse oil mists.

Test Oil	JIS Standard	Product Name
Lubricant	-	Velocity Oil No. 3
Water-insoluble cutting oil	2-5	Daphnecut AS-30D
	2-11	Yushiron Oil No.2ac (Note)
Water-soluble cutting oil	W1-1	Yushiron Lubic HWC68 (Note)
	W2-1	Yushiroken S50N (Note)

1,000 hours; Immersion (depth 0 m); Insulation resistance 20 MΩ/250 V
Note: Yushiron and Yushiroken are registered trademarks of Yushiro Chemical Industry Co., Ltd.

Strongly ethanol resistant CX-44□/48□

Incorporates a polycarbonate indicator cover that strongly resists ethanol. This makes it compatible with food processors that spray ethanol-based cleaning fluids.

Upgrade 1

Reducing environmental burdens further

Up to 60% less power consumption

The **CX-400** series achieves reductions in power consumption of up to 60%, averaging 44% reduction when upgrading due to its unique design. These sensors reduce carbon emissions and contribute to environmental friendliness.

Contributing to reduced carbon dioxide emissions

Electricity consumed by the **CX-400** series has been reduced on average 10.5 mA. Calculating 8 hours/day, 260 days (operating 5 days/week) for a total of 2,080 hours/year leads to:

The **CX-400** contributes

Approx. 84.6 t annually in carbon dioxide reductions to the world

Upgrade 2

Stronger noise resistance

Stronger inverter countermeasures

The **CX-400** has a high noise resistance then its previous model. By incorporating an inverter countermeasure circuit that appropriately shifts with peak wavelength, the sensor now resists high-frequency noise from high-voltage inverter motors and inverter lights more effectively.

Upgrade 3

Stronger output short-circuit resistance

Stronger inverse wiring connection protection

Strengthening the output circuit inverse polarity protection prevents sensor damage caused by mistaken output or power supply wiring.

High Performance

High performance
For many applications

Thanks to its unique optics and specialized design, the **CX-400**'s electronic circuits allows for consistent sensing of minute 0.4 mm **0.016 in** (the thickness of a business card) differences or 10 μ m **0.394 mil** ultra-thin film.

Save

Thoroughly eliminating unnecessary waste,
Reducing many environmental burdens

The **CX-400** series have three different cable length types and uses very simple packaging to reduce waste. The bag is made of polyethylene and does not emit toxic gasses.

Thru-beam type

Strong infrared beam CX-412/413

Remarkable penetrating ability enables applications such as package content detection come into practice. (Note)

Note: When sensing utilizing penetrating power, make sure to verify using the actual sensor.

Strong in dust and dirt CX-412/413

The infrared light source is strong in dust and dirt compared to the red beam type.

Even the thru-beam type is strong at mutual interference CX-411

Two CX-411 sensors, with their red beam light source, can be installed close together by inserting an interference prevention filter.

Interference prevention filter (Optional)

Applications

- Detecting box collapsing within the rail of stacker crane

- Synchronizing sensor for image processing systems

Retroreflective type

Long sensing range of 5 m 16.404 ft CX-493

A long 5 m 16.404 ft sensing range is possible with the red LED type that is easy to align with the beam axis. The sensors can be used for wide automatic door shutters.

Retroreflective type with polarizing filters CX-491

Built-in polarizing filters ensure stable sensing even on a mirror surface object.

Strong against extraneous light and noise CX-491

Hardly affected by extraneous lights or noises, these sensors provide stable sensing.

Two sensors can be mounted close together All models

The interference prevention function lets two sensors of any type to be mounted close together precisely.

Diffuse reflective type

CX-422: 800 mm **31.496 in**

CX-421: 300 mm **11.811 in**

CX-424: 100 mm **3.937 in**

CX-423: 70 to 300 mm

2.756 to 11.811 in

Narrow-view type

Beam axis alignment made easy with a high luminance spot beam CX-423

These sensors have a high luminance red LED spot beam which provides bright visibility enabling the sensing position to be checked at a glance. Because it achieved small beam spot approx. $\varnothing 2 \text{ mm}$ **$\varnothing 0.079 \text{ in}$** at setting distance 100 mm **3.937 in** , approx. $\varnothing 5 \text{ mm}$ **$\varnothing 0.197 \text{ in}$** at setting distance 200 mm **7.874 in** , even the minutest object can be accurately detected.

Great visibility approx. $\varnothing 2 \text{ mm}$
 $\varnothing 0.079 \text{ in}$ high luminance spot beam
(at setting distance 100 mm **3.937 in**)

Reduction of volume adjustment labor All models

Because these sensors possess many variations depending on the sensing range, they enable you to make optimal volume adjustment easily.

Applications

■ Detecting pins in the case

■ Passage confirmation on substrate conveyor equipment

Introducing transparent object sensing type sensor CX-48□

Our unique optical system and transparent object sensing circuit provide stable sensing of thinner transparent objects than the conventional models.

Transparent objects detectable with CX-48□ (Typical examples)

Sensing object	Sensing object size (mm in)			
Glass sheet	$\square 50$	$\square 1.969$	$t=0.7$	$t=0.028$
Cylindrical glass	$\varnothing 50$	$\varnothing 1.969$	$t=50$	$t=1.3$
Acrylic board	$\square 50$	$\square 1.969$	$t=1.0$	$t=0.039$
Styrol (Floppy case)	$\square 50$	$\square 1.969$	$t=0.9$	$t=0.035$
Food wrapping film	$\square 50$	$\square 1.969$	$t=10 \mu\text{m}$	$t=0.394 \text{ mil}$
Cigarette case film	$\square 50$	$\square 1.969$	$t=20 \mu\text{m}$	$t=0.787 \text{ mil}$
Vinyl bag	$\square 50$	$\square 1.969$	$t=30 \mu\text{m}$	$t=1.181 \text{ mil}$
Pet bottle (500ml)	$\varnothing 66$	$\varnothing 2.598$		

Reflector setting range CX-481: 300 to 500 mm **11.811 to 19.685 in**

CX-482: 1 to 2 m **3.281 to 6.562 ft**

CX-483: 500 to 1,000 mm **19.685 to 39.370 in**

[with the RF-230 reflector at the optimum condition (Note)]

Each object should pass across the beam at the center between the sensor and the reflector.

ℓ : Length of cylindrical glasses

t : Thickness of sensing object

Note: The optimum condition is defined as the condition in which the sensitivity level is set such that the stability indicator just lights up when the object is absent.

Applications

■ Detecting glossy electric appliances

■ Detecting plastic bottles stacked on pallets

■ Passage confirmation of object on a conveyor belt

■ Detecting transparent film

Adjustable range reflective type

High precision type

CX-441/443

Can sense height differences as small as 0.4 mm 0.016 in, with hysteresis of 2 % or less

An advanced optical system provides sensing performance that is approx. 2.5 times than conventional models. Even ultra-small differences of 0.4 mm 0.016 in can be detected accurately.

Hardly affected by colors

Both black and white objects can be sensed at the same distances. No adjuster control is needed, even when products of different colors are moving along the production line.

The difference in sensing range 1% or less between non-glossy white paper with a setting distance of 50 mm 1.969 in and non-glossy gray paper with a brightness level of 5.

Select from 2 spot diameters as per application

Within the choice of 50 mm 1.969 in sensing range sensors, we offer small spot type of approx. \varnothing 2 mm \varnothing 0.079 in optimal for detecting minute objects and large spot type of approx. \varnothing 6.5 mm \varnothing 0.256 in capable of sensing objects covered with holes and grooves.

The bright spot makes beam axis alignment easy

All models

These sensors have a high luminance red spot that provides bright visibility. The sensing position can be checked at a glance. Because the CX-441 sensor has a small spot beam, at approx. \varnothing 2 mm \varnothing 0.079 in, even the minutest object can be accurately detected.

Can be used for sensing minute differences

All models

Equipped with a 5-turn adjuster so that even challenging range settings can be handled with ease.

BGS / FGS functions make even the most challenging settings possible!

The BGS function is best suited for the following case

BGS

Background not present

When object and background are separated

Not affected if the background color changes or someone passes behind the conveyor.

The FGS function is best suited for the following case

FGS

Background present

When object and background are close together
When the object is glossy or uneven

Unaffected by gloss, color or uneven surfaces when sensing objects present on a conveyor belt.

Caution: Please use the FGS function together with a conveyor or other background unit.

BGS (Background suppression) function

The sensor judges that an object is present when light is received at position A of the light-receiving element (2-segment element). This is useful if the object and background are far apart. The distance adjustment method is the same as the conventional adjustment method for adjustable range reflective type sensors.

FGS (Foreground suppression) function

The sensor judges that an object is present when no light is received at position B of the light-receiving element (2-segment element). Accordingly, even objects that are glossy can be sensed. This is useful if the object and background are close together, or if the object being sensed is glossy.

Applications

■ Small tablet detection

Detects minute objects unaffected by glossy background objects. Uses FGS function.

■ Biscuit detection

Stable sensing even for thin objects. Uses FGS function.

■ Passage confirmation

Not affected by color variations in objects and background objects. Uses BGS function.

	MS-AJ1-M	Horizontal mounting type
	MS-AJ2-M	Vertical mounting type
Sensor checker (Note 3)	CHX-SC2	It is useful for beam alignment of thru-beam type sensors. The optimum receiver position is given by indicators, as well as an audio signal.

- Notes: 1) The plug-in connector type sensor does not allow use of some sensor mounting brackets because of the protrusion of the connector.
 2) Refer to the general catalog for details of the universal sensor mounting stand.
 3) Refer to the general catalog for details of the sensor checker **CHX-SC2**.
 4) Set the distance between the sensor and the reflective tape to 0.1 m **0.328 ft [CX-482□]**, 0.4 m **1.312 ft** or more.
 5) Set the distance between the sensor and the reflective tape to 0.2 m **0.656 ft** or more.

Cable		0.2 mm ² 3-core (thru-beam type emitter: 2-core) cabtyre cable, 2 m 6.562 ft long													
Cable extension		Extension up to total 100 m 328.084 ft is possible with 0.3 mm ² , or more, cable (thru-beam type: both emitter and receiver)													
Weight	Net	Emitter: 45 g approx., Receiver: 50 g approx.				50 g approx.				60 g approx.					
	Gross	100 g approx.				80 g approx.				60 g approx.					
Accessories		RF-230 (Reflector): 1 pc.													

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.
 2) The sensing range and the sensing object of the retroreflective type sensor are specified for the RF-230 reflector. The sensing range represents the actual sensing range of the sensor. The sensing ranges itemized in "A" of the table below may vary depending on the shape of sensing object. Be sure to check the operation with the actual sensing object.

	CX-491□	CX-493□	CX-481□	CX-483□	CX-482□
A	0 to 3 m 0 to 9.843 ft	0 to 5 m 0 to 16.404 ft	50 to 500 mm 1.969 to 19.685 in	50 to 1,000 mm 1.969 to 39.37 in	0.1 to 2 m 0.328 to 6.562 ft
B	0.1 to 3 m 0.328 to 9.843 ft	0.1 to 5 m 0.328 to 16.404 ft	100 to 500 mm 3.937 to 19.685 in	100 to 1,000 mm 3.937 to 39.37 in	0.8 to 2 m 2.625 to 6.562 ft

3) The sensing range and hysteresis of the diffuse reflective type sensor are specified for white non-glossy paper (200 x 200 mm 7.874 x 7.874 in) as the object.
 4) If slit masks (optional) are fitted, an object of ø0.5 mm ø0.020 in (using round slit mask) can be detected.
 5) Make sure to confirm detection with an actual sensor before use.

PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Mounting

- The tightening torque should be 0.5 N-m or less.

Wiring

- Make sure that the power supply is off while wiring.
- Take care that wrong wiring will damage the sensor.
- Verify that the supply voltage variation is within the rating.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of this product, connect the frame ground (F.G.) terminal of the equipment to an actual ground.

- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- Extension up to total 100 m **328.084 ft** (thru-beam type: both emitter and receiver) is possible with 0.3 mm², or more, cable. However, in order to reduce noise, make the wiring as short as possible.
- Make sure that stress by forcible bend or pulling is not applied directly to the sensor cable joint.

Others

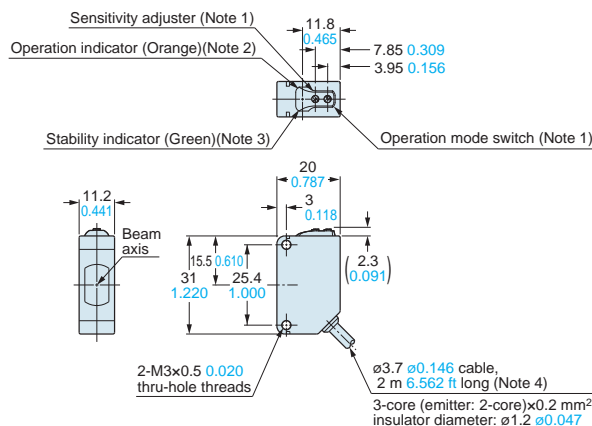

- This product has been developed / produced for industrial use only.
- Do not use during the initial transient time (50 ms) after the power supply is switched on.
- Take care that the sensor is not directly exposed to fluorescent light from a rapid-starter lamp or a high frequency lighting device, as it may affect the sensing performance.
- This sensor is suitable for indoor use only.
- Do not use this sensor in places having excessive vapor, dust, etc., or where it may come in direct contact with water or corrosive gas.
- Take care that the sensor does not come in direct contact with water, oil, grease or organic solvents, such as, thinner, etc.
- This sensor cannot be used in an environment containing inflammable or explosive gases.
- Never disassemble or modify the sensor.

MS-RF23

Reflector mounting bracket for RF-230 (Optional)

Material: Cold rolled carbon steel (SPCC)
(Uni-chrome plated)
Two M4 (length 10 mm 0.394 in) screws with washers are attached.

Assembly dimensions

MS-AJ1

Universal sensor mounting stand (Optional)

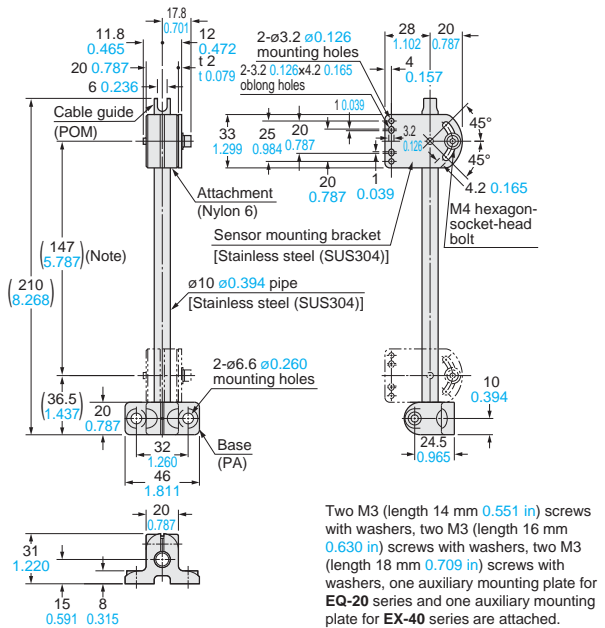

Two M3 (length 14 mm 0.551 in) screws with washers, two M3 (length 16 mm 0.630 in) screws with washers, two M3 (length 18 mm 0.709 in) screws with washers, one auxiliary mounting plate for EQ-20 series and one auxiliary mounting plate for EX-40 series are attached.

Note: The dimensions in the brackets indicate the adjustable range of the movable part.

MS-AJ2

Universal sensor mounting stand (Optional)

Two M3 (length 14 mm 0.551 in) screws with washers, two M3 (length 16 mm 0.630 in) screws with washers, two M3 (length 18 mm 0.709 in) screws with washers, one auxiliary mounting plate for EQ-20 series and one auxiliary mounting plate for EX-40 series are attached.

Note: The dimensions in the brackets indicate the adjustable range of the movable part.

Assembly dimensions with CX-400 series (Mounting part only)

Assembly dimensions with RF-210 (Reflector) (Mounting part only)

DIMENSIONS (Unit: mm in)

The CAD data in the dimensions can be downloaded from the website:
panasonic-electric-works.net/sunx

MS-AJ1-A Universal sensor mounting stand (Optional)

- Notes: 1) The dimensions in the brackets indicate the adjustable range of the movable part.
2) Refer to MS-AJ1 / MS-AJ2 for the assembly dimensions with the sensor mounting bracket, sensor or reflector.

MS-AJ2-A Universal sensor mounting stand (Optional)

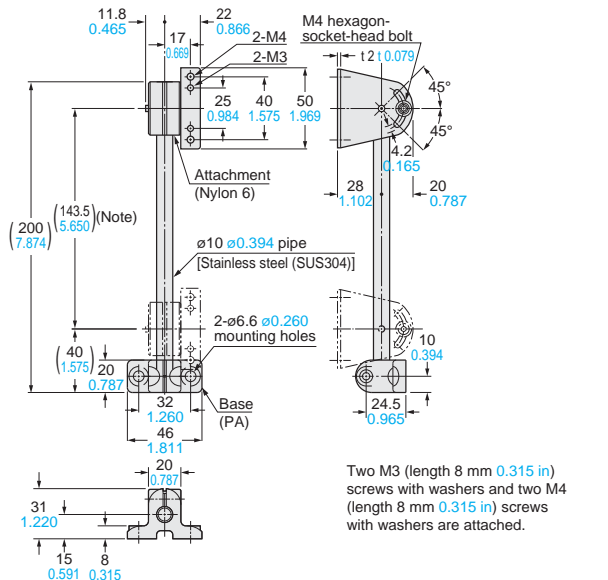

- Notes: 1) The dimensions in the brackets indicate the adjustable range of the movable part.
2) Refer to MS-AJ1 / MS-AJ2 for the assembly dimensions with the sensor mounting bracket, sensor or reflector.

MS-AJ1-M Universal sensor mounting stand (Optional)

Note: The dimensions in the brackets indicate the adjustable range of the movable part.

MS-AJ2-M Universal sensor mounting stand (Optional)

Note: The dimensions in the brackets indicate the adjustable range of the movable part.

Assembly dimensions with RF-220 (Reflector) (Mounting part only)

Assembly dimensions with RF-230 (Reflector) (Mounting part only)

Protecting the environment is one of our guiding business principles

Promoting a totally lead-free working environment

We are now working to eliminate the use of lead in all our in-house manufacturing processes such as in reflow ovens, hand soldering and parts and substrates procurement.

Using simple packaging

Simple, environmentally friendly packaging material reduces waste.

ISO 14001 environmental management system certification acquired

ISO 14001
JQA-EM0528

Our Nagoya Head Office and Factory acquired ISO 14001 certification in September 1999. Now and into the future, we will continuously improve environmental management systems based on our Environment Policy, which focuses on the promotion of environmentally friendly business activities and product development.
