

SMD 0805 + 1206

Platinum and Nickel

Thin-Film Chip Sensor

Product

To meet the market requirements for increasingly more efficient and economical manufacturing processes, we have developed the SMD 1206 series. A platinum or nickel temperature sensor which is designed for use in markets with a high degree of automation in their production line. This thin-film sensor combines the excellent characteristics of platinum or nickel sensors such as accuracy, long-term stability and reproducibility with the advantages of large-scale production and an optimal price/performance ratio.

Advantages

- Optimised for pick-and-place machines
- Cost-effective assembling
- Easy handling
- Platinum or Nickel thin film elements
- Lead-free (acc. RoHS)
