# OMRON Sounder

M2BJ-B

### **16mm Diameter Panel–Mounted Unit**

- Four models offer eight different types of sounds.
- Intermittent or continuous sound selected by jumper setting.
- Two supply voltages: 6 VAC/DC and 12 to 24 VAC/DC.
- Jumper storage provided at bottom of unit.
- Complements the A3G range of pushbuttons, selector switches and keyswitches.

## Ordering Information -

| Sound          | w/jumper        | Intermittent | Intermittent (short) | Intermittent<br>(high–pitched) | Intermittent<br>(short, high–pitched) |
|----------------|-----------------|--------------|----------------------|--------------------------------|---------------------------------------|
|                | w/o jumper      | Continuous   | Intermittent (long)  | Continuous<br>(high–pitched)   | Intermittent<br>(long, high–pitched)  |
| Supply Voltage | 6 VAC/DC        | M2BJ-B06     | M2BJ-B06A            | M2BJ-B06B                      | M2BJ-B06C                             |
|                | 12 TO 24 VAC/DC | M2BJ–B24     | M2BJ–B24A            | M2BJ–B24B                      | M2BJ–B24C                             |

# Hints on Correct Use

### Nut mounting

- Insert the buzzer unit from the front of the panel and tighten the mounting nut inserted from the rear of the panel.
- Since a projection exists on the rear portion of the buzzer unit, if the mounting nut cannot be fitted into position, turn the nut slightly.
- The tightening torque of the mounting nut should be less than 5 kg-cm.
- Solder the terminals after mounting the nut. Otherwise, the terminals, when thickened by solder, may prevent the nut from being screwed down onto the buzzer unit.

#### Snap-in mounting

Attach the mounting leaf spring to the buzzer. Engage the edges
of the leaf spring in the two grooves on the threaded section of the
buzzer. After inserting the leaf spring edges into the grooves,
confirm that the leaf spring has seated. Be sure to attach both leaf
springs.

• Insert the buzzer assembly into the hole on the mounting panel from the front.

#### Short-circuiting jumper

 The buzzer sounds continuously or intermittently depending on how the short-circuiting bracket is attached to the case guide.
 When the bracket is attached with the triangle on it facing direction A (PC board side), the buzzer sounds intermittently.

 To create continuous sounds, attach the bracket on the case guide so that the triangle on the bracket faces direction B.

### Mounting

• Tighten the mounting nut at a torque of less than 5 kg-cm.

### Wiring

- Exercise caution that the input terminals are not short circuited by the short-circuiting jumper.
- Finish soldering within 5 seconds with a 30 watt soldering iron, or within 3 seconds at a solder temperature of 240° C. For about a minute after soldering, do not apply any force to the buzzer unit, to avoid deforming the softened plastic buzzer unit base.
- Use a non-corrosive, resin based soldering flux.
