

SLM Series Slot Sensors

Self-contained opposed-mode sensor pair

Features

- An easy-to-use, self-contained, opposed-mode sensor pair in a U-shaped housing
- Rugged, sealed, die-cast metal housing is rated IEC IP67 (NEMA 6)
- Easy and economical to mount; molded-in beam guides simplify beam placement
- 8 slot widths from 10 mm to 220 mm for a wide variety of sensing applications
- Current sourcing (PNP), current sinking (NPN), or bipolar (one NPN and one PNP) output, depending on model
- Fast 500-microsecond response time
- Single-turn potentiometer Sensitivity adjustment
- Visible red beam
- Selectable Light Operate (L.O.) or Dark Operate (D.O.) with sealed switch
- Yellow painted finish standard; nickel-plated models also available †

Models

QD Models ¹	Slot Width	Supply Voltage	Output Type	Cabled Models ²	Slot Width	Supply Voltage	Output Type
SLM10P6Q	10 mm (0.39")	10 to 30V dc	PNP	SLM10B6	10 mm (0.39")	10 to 30V dc	Bipolar (one NPN and one PNP)
SLM10N6Q			NPN	SLM20B6			
SLM20P6Q	20 mm (0.79")		PNP	SLM30B6			
SLM20N6Q			NPN	SLM50B6			
SLM30P6Q	30 mm (1.18")		PNP	SLM80B6			
SLM30N6Q			NPN	SLM120B6			
SLM50P6Q	50 mm (1.97")		PNP	SLM180B6			
SLM50N6Q			NPN	SLM220B6			
SLM80P6Q	80 mm (3.15")		PNP				
SLM80N6Q			NPN				
SLM120P6Q	120 mm (4.72")		PNP				
SLM120N6Q			NPN				
SLM180P6Q	180 mm (7.09")		PNP				
SLM180N6Q			NPN				
SLM220P6Q	220 mm (8.66")		PNP				
SLM220N6Q			NPN				

NOTES:

1. QD models listed have 3-pin Pico-style integral QD. A model with a QD connector requires an accessory mating cable; see page 5.
2. Cabled models listed have 2 m (6.5') 4-wire cable. For 9 m (30') cable, add suffix "W/30" to the model number (e.g., **SLM10B6 W/30**).
For 150 mm (6") PUR pigtail cable with 4-pin threaded Euro-style QD connector, add "QPMA" to the model number (e.g., **SLM10B6QPMA**). A model with a QD connector requires an accessory mating cable; see page 5.

† Standard models have yellow painted surface. For models with nickel-plated surface, add the suffix "N" to the model number (e.g., **SLM10P6QN**).

See Safety Use Warning on Back Page

SLM Series Slot Sensors

Overview

The SLM Series Slot Sensor (sometimes called a “fork sensor”) comprises an opposed-mode emitter and its receiver inside a single convenient housing. Opposed-mode sensing is very reliable, and the single, self-contained housing provides easy installation, with no sensor alignment required. In addition, molded-in arrows on the housing show at a glance the position of the beam, simplifying installation placement.

Applications include counting, gear tooth detection, edge detection, part sensing on conveyor rails and belts, position and orientation verification, dimension verification, tool break monitoring, and level monitoring.

Figure 1. SLM Series features

Sensor Configuration

NOTE: For best results, objects to be detected should be placed midway between the emitter and receiver.

Sensitivity Adjustment

The sensor’s sensitivity is adjusted by turning the 270-degree-turn Sensitivity potentiometer with a small flat-blade screwdriver. Apply power to the sensor and turn the potentiometer all the way clockwise (max. gain). If the object to be sensed does not block the beam at max. gain, turn the gain down a little at a time, testing with the object, until the object can be sensed with reliability.

If adjusting the sensitivity with the potentiometer does not provide reliable object detection, investigate alternative sensing methods.

Light/Dark Operate Select

Select Dark Operate (D.O.) or Light Operate (L.O.) by turning the DO/LO selector switch to the desired setting using a small flat-blade screwdriver. If D.O. is selected, the output conducts when the receiver element does not see the emitted light (object is present). If L.O. is selected, the output conducts when the receiver element sees the emitted light (object is absent).

SLM Series Slot Sensors

Specifications

Slot Opening	10, 20, 30, 50, 80, 120, 180, or 220 mm (depending on model); beam is 5 mm (0.2") from outer edge							
Supply Voltage and Current	10 to 30V dc (10% ripple) @ less than 25 mA, exclusive of load							
Supply Protection Circuitry	Protected against reverse polarity and transient voltages							
Output Configuration	Cabled and Euro-style QD models: Bipolar: One current sourcing (PNP) and one current sinking (NPN) Pico-style QD models: Current sourcing (PNP) or current sinking (NPN), depending on model							
Output Rating	100 mA with short circuit protection OFF-state leakage current: < 10 μ A sourcing; < 200 μ A sinking ON-state saturation voltage: NPN: 1.6V @ 100 mA PNP: 2.0V @ 100 mA							
Output Protection Circuitry	Protected against output short-circuit and false pulse on power up. 100 ms max. delay at power up; outputs do not conduct during this time.							
	SLM10...	SLM20...	SLM30...	SLM50...	SLM80...	SLM120...	SLM180...	SLM220...
Minimum Object Detection* at Max. Gain	1.00 mm (0.040")	1.25 mm (0.050")	1.50 mm (0.060")	1.65 mm (0.065")	1.80 mm (0.070")	1.80 mm (0.070")	1.80 mm (0.070")	2.40 mm (0.095")
Minimum Object Detection* at 2X Excess gain	0.30 mm (0.012")	0.30 mm (0.012")	0.40 mm (0.016")	0.60 mm (0.024")	0.75 mm (0.030")	0.90 mm (0.035")	0.90 mm (0.035")	1.00 mm (0.039")

Repeatability***	0.02 mm (0.001")	0.02 mm (0.001")	0.02 mm (0.001")	0.04 mm (0.002")	0.06 mm (0.002")	0.08 mm (0.003")	0.08 mm (0.003")	0.08 mm (0.003")
Output Response Time	500 microseconds							
Repeatability	95 microseconds							
Adjustments	1-turn potentiometer Sensitivity adjustment Light Operate / Dark Operate selection switch							
Indicators	Two LED Indicators: Power (green) and Output (yellow) Green ON steady: Power ON Green flashing: Sensor short circuit Yellow ON steady: Output is activated							
Construction	Housing: Die-cast zinc with yellow paint; model numbers with suffix "N" have nickel plating Endcaps: ABS Optic windows: acrylic							
Environmental Rating	IEC IP67 (NEMA 6)							
Connections	Cabled models: 2 m (6.5') or 9 m (30') 4-conductor, PVC-jacketed cable Pico-style QD models: 3-pin, threaded integral QD connector Euro-style QD models: 150 mm (6") pigtail (polyurethane) cable with 4-pin, threaded connector							
Operating Conditions	Temperature: -20° to +60° C (-4° to +140° F) Max. Relative Humidity: 95% @ 55° C (non-condensing)							
Certifications								

***Minimum Object Detection:** Smallest diameter rod that can be detected when passed slowly through sensing beam

NOTE: Minimum object detection is measured midway between the emitter and receiver. For best results, objects to be detected should be placed in the midway position when possible. The minimum object detection size may increase if the object is very close to the receiver side.

****Hysteresis:** Distance an object must move to toggle between output OFF and output ON state

*****Repeatability:** Variation in switching distance for a standard target at controlled sensing conditions

 **WARNING . . . Not To Be Used for Personnel Protection**

Never use these products as sensing devices for personnel protection. Doing so could lead to serious injury or death.

These sensors do NOT include the self-checking redundant circuitry necessary to allow their use in personnel safety applications. A sensor failure or malfunction can cause either an energized or de-energized sensor output condition. Consult your current Banner Safety Products catalog for safety products which meet OSHA, ANSI and IEC standards for personnel protection.

WARRANTY: Banner Engineering Corp. warrants its products to be free from defects for one year. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture found to be defective at the time it is returned to the factory during the warranty period. This warranty does not cover damage or liability for the improper application of Banner products. This warranty is in lieu of any other warranty either expressed or implied.
