\* **Q3 models:** 3-pin Pico-style (M8 threaded) 150 mm (6") pigtail QD. Not available for bipolar models.

Models with no suffix have standard 2 m (6.5') cables.

- For 9 m (30') cable, add suffix "**W/30**" to the model number (e.g., **Q126E W/30**).
- For 4-pin Pico-style (M8 threaded) 150 mm (6") pigtail QD, add suffix **Q** to the model number (e.g. **Q126EQ**).
- For 4-pin Euro-style (M12 threaded) 150 mm (6") pigtail QD, add suffix **Q5** to the model number (e.g. **Q126EQ5**).

\*\*Retroreflective range is specified using one model **BRT-60X40C** retroreflector. Actual sensing range may be more or less than specified, depending upon efficiency and reflective area of the retroreflector(s) used.

## Apertures

Opposed-mode Q12 sensors (standard models only) may be fitted with apertures to narrow or shape the sensor's effective beam to more closely match the size or profile of the objects being sensed. A common example is the use of "line" (or "slot") type apertures to sense thread.

NOTE: The use of apertures will reduce the sensing range (see table below).

Model	Description		Reduced Sensor Range (Two Apertures Used)
APQ12-5		0.5 mm (0.02") diameter – 10 each	60 mm (2.4")
APQ12-1		1 mm (0.04") diameter – 10 each	190 mm (7.5")
