Technical Data Sheet

PRODUCT DESCRIPTION: Air Powered Bottle DATE: 03/97

PRODUCT CODE: APB000 PAGES: 1

PRODUCT DESCRIPTION

Electrolube's Air Powered Bottle has been specially developed for users who wish to achieve "aerosol" results, without the use of propellants. The 300ml HDPE bottle, which should only hold a maximum of 200ml of fluid is pumped up by hand, ready to spray.

PRODUCT USE

Fill the container to the bottom of the pumping valve (approximately 200ml) to allow sufficient pressurisation. Ensure that the viscosity is low enough so that a good spray pattern is achieved. Insert the pumping valve and secure with the collar. In order to pressurise the container, place the pumping cap over the actuator and pump until the required pressure is achieved.

This product is compatible for use with IPA and aqueous solutions. However, particular care should be taken with aggressive solvents.

FEATURES

- * Achieve "aerosol" results without the use of propellants.
- * Flexibility to fill with own choice of product.
- * Re-usable container.

PACKAGING ORDER CODE

300ml HDPE bottle APB000
