

3M™ Static Dissipative Sheet Protectors 5410 and 5411

Normal PVC or polyethylene sheet protectors keep documents protected but risk exposing electronic devices to the static electricity created by the sheet protectors. 3M™ Static Dissipative Sheet Protectors 5410 and 5411 are non-static generating while at the same time protecting documents that are placed into the sheet protector. This product is designed for ESD controlled areas where there are ESD sensitive devices.

3M™ Static Dissipative Sheet Protectors 5410 and 5411 are made from durable static dissipative polypropylene plastic. Ink from photo copies will not stick to it. A thinner sheet allows for more documents to be placed into a binder. The embossed pattern on the sheet protector helps to reduce glare. Each sheet protector is printed with the ESD protective symbol to clearly identify it as static dissipative.

Features

- Static Dissipative for ESD protection
- Non-stick polypropylene plastic keeps ink from photo copies from sticking to sheet protector
- Strong polypropylene plastic allows the sheet protector to be thinner, allowing more pages to fit into a binder
- Printed with ESD caution logo for easy identification
- Embossed pattern helps to reduce glare
- Top loading for easy access and secure document containment
 - Holds 8.5 x 11 inch documents (5410) or European version A4 (5411)

Specifications

Material	Polypropylene
Paper Size	5410 fits letter; 5411 fits A4 pages
Style	Top loading, 5410 fits 3-ring binders; 5411 fits European version binders
Surface Resistivity	10^9 - 10^{11} ohms/square ASTM D257
Static Decay	<1 second
Thickness	2 mils +/-15%
Packaging	100 sheets per box

Product Number	Description	3M ID Number
5410	3M™ Static dissipative sheet protector for 8.5" x 11" pages	80-0012-0910-7
5411	3M™ Static dissipative sheet protector (A4 European Version)	80-0012-0911-5
