

# Electric Capacitive Type

## Electric capacitive type proximity sensor

### ■ Features

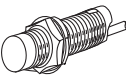

- Able to detect iron, metal, plastic, water, stone, wood etc
- Long life cycle and High reliability
- Reverse power polarity (DC), surge (AC/DC)
- Easy to adjust of the sensing distance with sensitivity adjuster
- Red LED status indication
- Easy to control of level and position

 Please read "Caution for your safety" in operation manual before using.

### ■ Type

#### ◎ DC 3-wire type

| Appearances   | Model        |
|---|--------------|
| M18  | CR18-8DN     |
|   | CR18-8DP     |
|   | CR18-8DN2 ※  |
| M30  | CR30-15DN    |
|   | CR30-15DP    |
|   | CR30-15DN2 ※ |

#### ◎ AC 2-wire type

| Appearances   | Model     |
|---|-----------|
| M18  | CR18-8AO  |
|   | CR18-8AC  |
| M30  | CR30-15AO |
|   | CR30-15AC |

▶ "※" mark can be customized.

### ■ Specifications

| Unit weight                         | Approx. 72g   | Approx. 212g                         | Approx. 63g               | Approx. 220g           |

※ (\*1) The response frequency is the average value. The standard sensing target is used and the width is set as 2 times of the standard sensing target, 1/2 of the sensing distance for the distance.

## Control output diagram

◎DC 3-wire type

◎AC 2-wire type

## Connections

◎DC 3-wire type

◎AC 2-wire type

※ The load can be connected to either wire.

# Electric Capacitive Type

## ■ Sensitivity adjustment

Please turn potentio VR to set sensitivity as below procedure.

- 1** Without a sensing object, turn the potentio VR to the right and stop at the proximity sensor is ON(OFF).

- 2** Put the object in right sensing position, turn the potentio VR to the left and stop at the proximity sensor is OFF(ON).

- 3** If the difference of the number of potentio VR rotation between the ON(OFF) point and the OFF(ON) point is more than 1.5 turns, the sensing operation will be stable.

- 4** If it is set in sensitivity adjustment position of potentio VR at center between **1** and **2**, sensitivity setting will be completed.

※When there is distance fluctuation between proximity sensor and the target, please adjust **2** at the farthest distance from this unit.

※Turning potentiometer VR toward clockwise, it will be Max. and turning toward counter clockwise, it will be Min. the number of adjustment should be  $15 \pm 3$  revolution and if it is turned to the right or left excessively, it will not stop, but it idles without breakdown.

※ ( ) is for Normal Close type.

## ■ Grounding

The sensing distance will be changed by grounding status of capacitive proximity sensor and the target [50×50×1mm(Iron)]. Please check the material when installing it on panel.

### ●CR18 Type

| Ground condition (Switch b) | ON | OFF |
|-----------------------------|----|-----|
| Operating distance (mm)     | 8  | 4   |

### ●CR30 Type

| Ground condition       | Switch a | ON | OFF | ON  | OFF |
|------------------------|----------|----|-----|-----|-----|
|                        | Switch b | ON | ON  | OFF | OFF |
| Operating distance(mm) |          | 15 | 18  | 6   | 6   |

## ■ Mutual-interference & Influence by surrounding metals

When several proximity sensors are mounted closely, malfunction of sensor may be caused due to mutual interference. Therefore, be sure to provide a minimum distance between the two sensors, as below charts.

Face to Face

Parallel

| Model<br>Item | CR18 | CR30 |
|---------------|------|------|
| A             | 48   | 90   |
| B             | 54   | 90   |

(Unit:mm)

When sensors are mounted on metallic panel, you must prevent the sensors from being affected by any metallic object except target. Therefore, provide minimum distance as shown.

| Model<br>Item | CR18 | CR30 |
|---------------|------|------|
| $l$           | 20   | 10   |
| $\phi d$      | 54   | 90   |
| $m$           | 24   | 45   |
| $n$           | 54   | 90   |

(Unit:mm)

## ■ Materials

### ◎Materials of sensing targets

Sensing distance may be different by electrical characteristic of sensing target (Conductivity, Non dielectric constant) and status of water absorption, size etc.

### ◎Effect by high frequency electrical field

It may cause malfunction by machinery which generate high frequency of electrical field such as a washing machine etc.

### ◎Surrounding environment

There is water or oil on surface of sensing part, it may cause malfunction.

If the bottle for detecting of level is coated by oil etc., it may cause malfunction.

Especially, 15mm type has high sensitivity for induced objects, please be careful of waterdrops.

### ◎Oil

Do not let the oil or oil liquid is flowed into the sensor, the case is made by plastic.
