Envirostat FP6E from United Automation

The Electronic Thermostat for Frost Protection

- Temperature Range -10 to +10°C
- 25 Amps Current Capacity
- Suitable for 230VAC
- Soft Start
- LED Indication
- Includes Integrated Sensor
- IP65 Rating
- Mains Supply Indication
- Load Failure Indication
- Sensor Fault Indication

The Envirostat FP6E is an electronic thermostat designed to give energy efficient frost protection to pipe work where thermal insulation alone cannot protect pipes from freezing or being damaged by ice. With the cost of energy and the environment becoming a major factor that all businesses are now accountable for, United Automation has introduced the Envirostat range of products.

The Envirostat FP6E is designed to offer frost protection with a temperature range of -10C to +10C.

The FP6E model offers a high quality controller with a wide range of features often associated with more expensive products. With years of experience in design and manufacturing control systems, many of these features are already incorporated within our products.

- Accurate temperature monitoring and control for loads up to 25A.

- Reduced Inrush Current via Soft Start offers Increased Safety and improved Life of Heater Tape

- Built for a variety of applications it offers visual indication when a failure occurs.

- System and Load test on Installation plus 4 hourly retest.

- The Envirostat is a cost effective solution to a potentially expensive failure.

Benefits

- Soft Start
- Energy Saving
- Simple Installation
- Closed Loop Temperature Control
- RoHS Compliance
- CE Approved
- Low Cost Solution
- Solid State Reliability
- Maintenance Free
- Wide range of Applications

Technology when you need it most

X50064 Issue1 30/08/2010

Features

- Soft Start
- LED Indication
- 6kW Switching Capacity
- Mains Supply Indication
- Load Failure Indication
- Sensor Fault Indication

Envirostat FP6E from United Automation

The Electronic Thermostat for Frost Protection

Envirostat FP6E provides a complete solution for monitoring a wide range of applications. With built in alarm features to monitor internal and external faults.

The envirostat will automatically switch the power off to the load once an error is detected.

With solid state reliability, this product can be fitted and left to work, only notifying you when a fault is detected.

Alarm Indication

Power LED GREEN Illuminates only when load is ON

Status LED RED:

- 0.5 second Pulse - Output/Load Failure
- 0.1 second Pulse – Sensor Failure

Technical Specification

Supply Voltage	230 VAC +/- 10%
Supply Frequency	50Hz
Switching Capacity	6kW Max
Temperature Range	-10 to 10℃
Accuracy	1℃
Soft Start Duration	1 second
Terminals	2.5mm² Rising Clamp
Operating Temperature	-20˚to 40C
Protection Rating	IP65
Current Consumption	15mA
Enclosure Dimensions	120x122x65
Fixing Centre's	110x90

SERVICES AVAILABLE

Technical Support

Installation and Setup

Application Support

Hardware Support

12 months Warranty
