Roundline Ecology Piston Seal Option (ERP)

The Ecology (Impact Dampening) Piston Seal option is available on select inch bore size Roundline cylinders in DAP, DAD, and DAN configurations. This option includes non-adjustable air cushions on both the extend and retract stroke of the cylinder. By including the Ecology Piston Seal option, cylinders can be specified based on weights of load being carried and speed of load. This is shown in the table below.

Energy Absorption Capacity of the Impact Dampening Piston Seal

This chart represents the energy absorption capacity of the Impact Dampening piston seals with standard Non-Adjustable air cushions. The values given are usable pounds stoppable at stated piston speeds.

Force Output Formula

Cylinder Output Force = Force Factor (area) x Air Line Pressure (psi)

Ex: 1-1/16" bore cylinder operating at 80 psi:

Force exerted on the extend: 0.89 x 80 = 71.2 lbs.

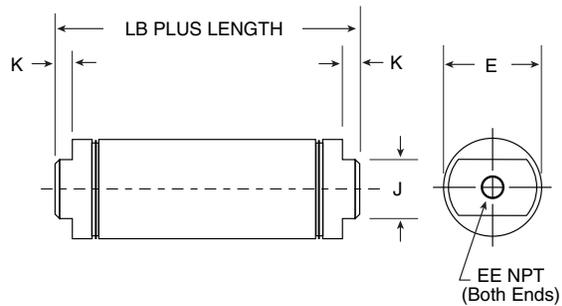

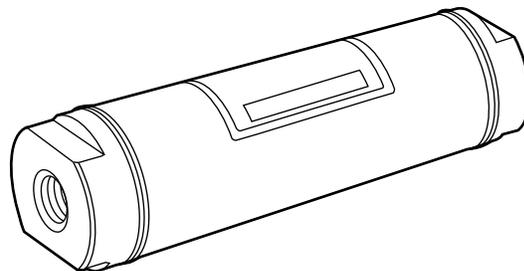

Force exerted on the retract: 0.69 x 80 = 55.2 lbs.

Approximate Spring Forces (lbs.)

How to Order

Example:

1-1/16" bore air reservoir with a 3" internal length would be ordered as follows: AR-1-1/16 x 3

Roundline Plus Stainless Steel Actuators

CH,CC,CB - Adjustable Cushions

Available only on DAN, DAP, and DAD models.

UB - Bumpers

Bumpers are standard on 5/16", 7/8", 1-1/4", and 1-3/4" bores - when the HT high temperature option is ordered, the bumpers are omitted and the overall length may decrease (except 5/16" bore). Single acting models will have one bumper on the piston side opposite the spring. (see chart for changes in overall length due to bumper, or bumper omission.)

NOTE: Bumpers are not included with the Ecology Seal model.

7/16"	0.062	0.125	0.188	0.25

2-1/2"	0.125	0.125	0.250	0.250
3"	0.125	0.125	0.250	0.250

* When the UB and PS options are in combination on an 1-1/16" bore, double rod end, only the bumper length should be added. All other models and bore sizes should add the UB length and the PS length together.

HT - High Temperature Seals

For service up to 400°F.

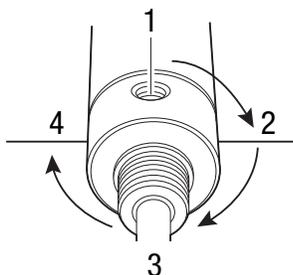

Not available with RW rod wiper option. When ordered with the UB bumper option, cylinder will only be rated to 200°F - as this is the temperature limitation of the bumpers.

For cylinders where bumpers are standard, opting for High Temperature seals will omit the bumpers and may decrease the overall length of the cylinder (except the 5/16" bore). See below for length changes.

Bore	Decrease in Overall length due to HT option (in.)			
	Single Acting	Reverse Acting	Double Acting	Double Rod End
5/16"	0.000	0.000	0.000	0.000

1-3/4"	0.125	0.125	0.250	0.250

PL() - Alternate Port Location

Designate location on head and cap respectively. For example: L(12) = Head port location 1, and Cap port location 2.

PC - Side ported end cap (DAN and SAN models only)

Port will be on the side of the end cap and in line with the head end port. Overall length of the cylinder will increase.

Change in overall length due to the PC option.

* When the UB and PS options are in combination on an 1-1/16" bore, double rod end, only the bumper length should be added. All other models and bore sizes should add the UB length and the PS length together.

** Ecology piston seal adds .375" to the overall length when combined with PS option on the 1-1/16" bore DRD model only.

Rail shown at position M2

M1,M2,M3,M4 - Switch rail mounted and position

Switch rail will be mounted in position #1 for M1 option, Position #2 for M2 option, etc. Must also reference the PS option in the cylinder model number to receive a magnet on the piston.

A band style switch bracket can be ordered as a separate item instead of the switch rail. See switch section for band style bracket information.

Switches ordered as separate items.

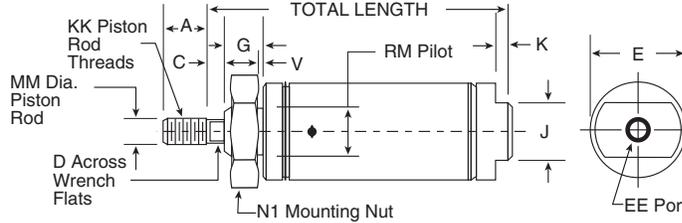

FT() - Female thread

Specify thread type in parentheses. Female rod thread available on 1-3/4", 2", 2-1/2", 3" bores.
