

## Description

One, two and three pole thermal-magnetic circuit breakers with trip-free mechanism and toggle actuation (S-type TM CBE to EN 60934/IEC 934). Featuring a combi-foot design for both symmetric and asymmetric rail mounting. Available with auxiliary contact (1 x N/O or 1 x N/C) for status signalling. Two and three pole models are internally linked to ensure that both/all poles trip in the event of an overload on one pole, even if the actuator is held in the ON position. This CBE can be supplied in current ratings up to 32 A with a choice of characteristic curves. All screw terminals are recessed for safety. Approved to CBE standard EN 60934 (IEC 60934).

## Typical applications

Process control equipment, robotics, machine tool control, communications systems, instrumentation.

### -F2 0.1 ... 7.5 A

### -F2 8 ... 16 A

<sup>1)</sup>Magnetic tripping currents are increased by 30% on DC supplies.

## Typical time/current characteristics

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section 9 – Technical information.

Technical Information									
Ambient temperature	°F -22	-4	+14	+32	+73.4	+86	+104	+122	+140
	°C -30	-20	-10	0	+23	+30	+40	+50	+60
Derating factor	0.76	0.79	0.83	0.88	1	1.04	1.11	1.19	1.29

Multi pole devices: all poles symmetrically loaded. With single pole overload, thermal tripping will be at max.  $1.7 \times I_N$  with curves F1, F2, M1 and T2, and at max.  $2.2 \times I_N$  with curve M3.

<sup>1)</sup> Magnetic tripping currents are increased by 30% on DC supplies.
