

Single Layer Varistors

VC32 Series

GENERAL DESCRIPTION

The VC32 Series offers the designer a surface mount solution with higher voltage ratings and transient energy ratings than typical multi-layer varistors (MLVs). Think of this series as *surface mountable MOVs*. This series, based on our proven zinc oxide formulation, operates from -55°C to 125°C. Additionally, the top and bottom surfaces of the chip are protected with a glass coating.

APPLICATIONS

- MOV (Radial) Replacement
- Industrial Equipment
- Suppression of transient on line voltage
- Mains PSUs
- Electric Meters
- Telecommunications
- Consumer Electronics
