Application notes

- Choose supply with output voltage corresponding to the input voltage requirement of the LED product (see datasheet of LED product).
- These power supplies are not designed for use in outdoor environments.
- If not intending to make use of the 2.1mm output plug, it is recommended to remove
 the plug using a standard pair of sharp snips and to strip back the wires for connection
 to the LED product either via soldering, an alternative connector, or through the use of
 standard electrical screw terminals.
