

T2035H, T2050H

High temperature 20 A Snubberless™ TRIACs

Features

- Medium current TRIAC
- 150 °C max. T_i turn-off commutation
- Low thermal resistance with clip bonding
- Very high 3 quadrant commutation capability
- Packages are RoHS (2002/95/EC) compliant

Applications

Especially designed to operate in high power density or universal motor applications such as vacuum cleaner and washing machine drum motor.

Description

Available in through-hole and sureface mount packages , the T2035H and T2050H TRIAC series are suitable for general purpose mains power AC switching.

These 20 A TRIACs provide a very high switching capability up to junction temperatures of 150 °C.

The heatsink can be reduced, compared to traditional TRIACs, according to the high performance at given junction temperatures.

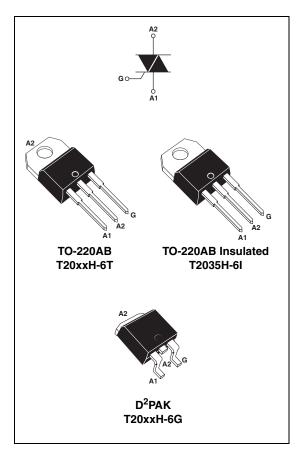

Table 1. Device summary

Symbol	Value	Unit
I _{T(RMS)}	20	Α

3 Package information

- Epoxy meets UL94, V0
- Recommended torque 0.4 to 0.6 Nm

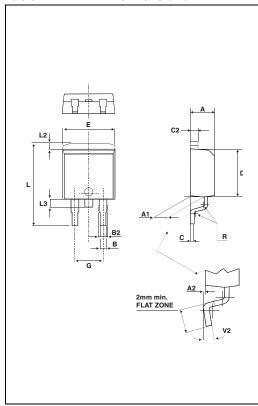

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
