

RHINO™ LABELS

RHINO tapes are developed for harsh environments and provide resistance against abrasion, different temperatures, chemicals, solvents, water and UV. DYMO offers several specific materials depending on the application, all with a strong adhesive and carefully chosen ribbon for high print quality and resistance.

FULL BACKSLIT FOR EASY PEEL

RHINO tapes include specific material depending on the application. They all feature super strong adhesives that stick and last in harsh environments, attached to flat, curved, textured and highly-textured surfaces.

FLEXIBLE NYLON TAPE is specifically designed for wire and cable marking.

PERMANENT POLYESTER TAPE can be used on a variety of flat, textured or highly textured surfaces and has an excellent solvent and chemical resistance.

CLEAR PERMANENT POLYESTER with the sharp printed black characters integrate very nicely the structure and background of the application.

COLOURED VINYL TAPE combines flexibility, a strong adhesive and a high chemical resistance which makes this tape suitable for many type of applications where colour is requested.

HEAT SHRINK TUBING is a non-adhesive yet permanent polyolefin solution to identify and protect your wire and cables at the same time. Flame retardant and 3:1 shrink ratio.

NON-ADHESIVE TAG: ideally to be used as an insert for label holders.

NEW! SELF-LAMINATING VINYL LABELS protect your printed area from exposure (to oil, solvents, water and abrasion) ideal for wire and cable marking.
