## Optimum Versatility!

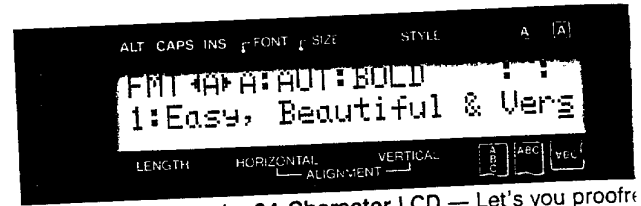

Ingenious is the only word that describes the Brother P-Touch 8000 Professional Labelling System.

There's never been anything like it! This unique system opens up creative possibilities that were considered impossible with ordinary machines.

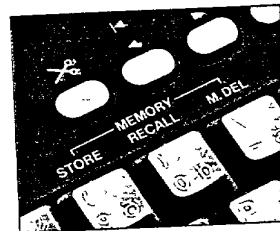

Within its price range, it has a bigger selection of fonts, characters and sizes than any other system and a huge number of symbols. In addition, it features a familiar full-size typewriter keyboard (62 key) and a two-line 24-character display, so it's also remarkably easy to use.

Another breakthrough is its size. Smaller and lighter, it brings a whole new meaning to portability. Versatile operation with AC adaptor or optional Ni-Cad battery allows you unlimited freedom of use, anywhere.

If you want professional labels, in virtually any size, any colour and for any application, you want the advanced Brother P-Touch 8000.

Extra Large 2-Line by 24-Character LCD — Let's you proofread and edit out errors before anything is printed.

3,300-Kbytes of memory for text storage — Allows the storage of most frequently printed data and formats to be stored and recalled for future use.

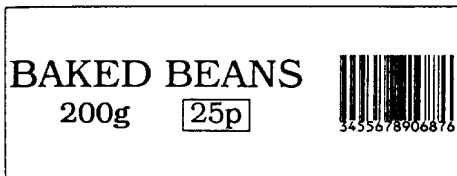

Automatic Tape Cutter — Saves you the time and trouble of individually cutting tapes. Left and right margins can be set between 4 and 25 centimeters.
