

**Ferrania** imaging technologies **FILM MAKER SINCE 1923**

**OptiJet**  
inkjet media

**Free imagination  
Communication freedom!**  
A wide range to meet every requirement

**Ferrania**  
Imaging Technologies

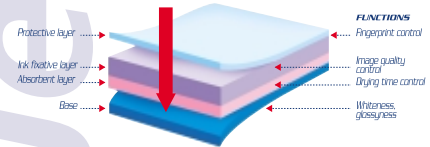

Since 1923, Ferrania Imaging Technologies has researched, developed, produced and supplied products and services to imaging and photographic markets throughout the world.

Ferrania has utilised its skills and knowledge acquired from the photographic film sector, to develop a range of high quality paper for inkjet printers that cover all application requirements, with a particular focus on photographic papers.

**OptiJet**  
inkjet media

In the OptiJet™ range, created by Ferrania Imaging Technologies, the photographic paper is designed to achieve the best possible image quality with any inkjet printers. The Advanced Multilayer Technology controls the ink absorption and assures glossy and saturated colours.

**MULTILAYER STRUCTURE**

**Glossy and sharp images.**

Each layer coated on the base performs a specific function:

- **Protective Layer:** Protects the image from fingerprints, scratches and UV-ray.
- **Ink Fixative Layer:** Allows a minimal amount of ink to create optimum colour brilliance and sharpness.
- **Absorbent Layer:** absorbs the inks liquid, reducing the risk of the ink bleeding.

**Total compatibility**

Excellent results on any kind of inkjet printers: Epson, Canon, HP, Lexmark...

**Excellent colour brilliance**

High resolution print  
For high images definition. Printable up to 2880/5760 dpi.

**Wide media options**

A wide range of supports and formats for any kind of requirements.

**Simplicity and functionality**

To ensure the best results are obtained, easy to follow printing set up instructions are included in every pack.

**OptiJet**  
inkjet media

**PROFESSIONAL**
