#### **Movon MK20 Bluetooth Car Kit**

A truly worthy successor to the highly popular Movon MK10, the brand new Movon MK20 - both a sun visor kit and a desktop handsfree - retains all the superb qualities and features of its predecessor. But even better - the MK20 is fully duplex and has enhanced audio output, a detachable magnetic sun visor clip to leave in the car when it becomes a desktop handsfree and unbelievably, it's even more attractive than before! We asked TMTI to thoroughly put the MK20 through its paces. They particularly liked its overall design, its ease of use, construction and durability, screen readability and easy handset pairing (once connected it automatically re-connects).

#### **Features:**

##### **Features:**
