# LENS MOUNTS FOR 3mm & 5mm LEDs

 $\square \square$  **CLIPLITE**<sup>®</sup>

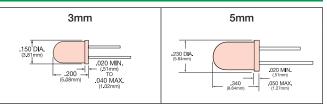

| SPECIFICATIONS |                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|
| MATERIAL       | Lens - Polycarbonate<br>Spacer - Polypropylene<br>(U.L. Listed Materials)                                                                                                                                                                                                                                                                                                                            |  |  |  |
| DESIGN         | Standard and low profile lenses with fresnel rings and striated lines. CLR 301 Low Profile Lens is available without fresnel rings.                                                                                                                                                                                                                                                                  |  |  |  |
| MOUNTING       | Mounts through front of panel. Mounting holes should be deburred but not chamfered.                                                                                                                                                                                                                                                                                                                  |  |  |  |
|                | 3mm (SML 190, SMB 200) mounts in a .171" $\pm$ .002" (4.34mm) hole<br>on 1/4" centers. Panel thickness for SML 190, 1/32" to 1/16"; SMB 200,<br>1/16" to 1/8". 5mm (CLF 280, CLB 300, CLR 301) mounts in a .250" $\pm$<br>.002" (6.35mm) hole on 3/8" centers. Panel thickness for CLF 280, 1/16"<br>to 1/8"; CLB 300 and CLR 301, 1/32" to 1/4"; for panels less than 3/16",<br>use SPC 125 spacer. |  |  |  |
|                | Lens retaining ring - available for added security (RNG 190, 3mm & RNG 268, 5mm).                                                                                                                                                                                                                                                                                                                    |  |  |  |

CLIPLITE® from the back.

# **RECOMMENDED LEDs**

U.S. & Foreign Patents Issued and Pending

#### VISIBILITY

CLIPLITE® lenses produce up to 180 degrees of viewing angle using standard 3mm and 5mm LEDs.

#### BRIGHTNESS

The CLIPLITE® lens utilizes striated lines and fresnel rings to increase apparent brightness up to 125% and viewing angle up to 180 degrees with either diffused or nondiffused LEDs. A low profile lens without rings or lines is available for direct sunlight applications.

### PROTECTION

CLIPLITE<sup>®</sup> lenses help prevent IC failures caused by electrostatic discharge (ESD). Simply walking across a carpet can generate 10,000 volts. Introduction of this ESD through an exposed panel mounted LED is capable of damaging or destroying a semiconductor. A CLIPLITE® mounted LED helps guard components from ESD up to 16kV while affording the LED physical protection.

## INSTALLATION

CLIPLITE®, standard or low profile, requires no assembly tools; just snap into a panel opening and insert LED. Cost effective operation is complete in only 6 seconds.

| MODEL   |                                  | co  | LOR                |
|---------|----------------------------------|-----|--------------------|
| SML 190 | -<br>(3mm) Std. Hat.             | RTP | Red Transparent    |
| SMB 200 | (3mm) L/Profile                  | ATP | Amber Transparent  |
| CLF 280 | (5mm) Std. Hgt.                  | GTP | Green Transparent  |
| CLB 300 | (5mm) L/Profile                  | BTP | Blue Transparent   |
| CLR 301 | (5mm) L/P Plain                  | YTP | Yellow Transparent |
| SPC 125 | (Spacer for CLB 300 and CLR 301) | CTP | Clear Transparent  |
