## PRECAUTIONS FOR HANDLING ELECTROSTATIC SENSITIVE LEDS Static Electricity and Surge Static electricity and surge will damage the LED and a high standard of care must be taken during handling. It is recommended that a wristband, conductive mat or anti-electrostatic glove is used when handling the LEDs. All devices, equipment (e.g. soldering iron points) and machinery must be properly grounded. SAFETY PRECAUTIONS FOR HANDLING HIGH BRIGHTNESS LEDS The light output of the Products may cause injuries to human eyes in circumstances where they are viewed directly with unshielded eyes for more than a few seconds. Please refer to European Standard BSEN 100015-1 1992 for further information.
