

Solderable Planar Photodiode

Features

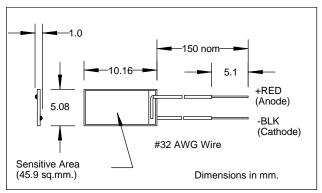

- Visible and IR spectral response
- · High reliability
- Oxide passivation
- Linear short circuit current
- Low capacitance, high speed
- Protective coating

Description

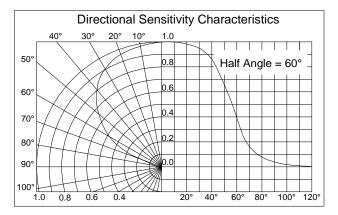

The Silonex series of silicon solderable planar photodiodes feature low cost, high reliability, and linear short circuit current over a wide range of illumination. These devices are widely used for light sensing and power generation because of their stability and high efficiency. They are particularly suited to power conversion applications due to their low internal impedance, relatively high shunt impedance, and stability. The photodiodes have a protective coating that protects them from humidity effects. These devices also provide a reliable and inexpensive detector for instrumentation and light beam sensing applications.

Absolute Maximum Ratings

Storage Temperature -40° C to $+105^{\circ}$ C Operating Temperature -40° C to $+105^{\circ}$ C

Also available without leads as part number SLCD-61N3
