

Silicon Phototransistor and Photo Darlington in 1210 SMD Package

OP525, OP525DA, OP525F

Features:

- High Speed and High photo sensitivity
- Fast response time
- 1210 package size
- High Current Gain
- Water clear and black lens choices
- Narrow Viewing Receiving Angle
- Compatible with IR Reflow soldering process
- Moisture Sensitivity Level: MSL3

OP525 and OP525DA
OP525F

Description:

These devices consist of an NPN silicon phototransistor and photo darlington mounted in a miniature SMD package with a 1210 size chip carrier that is compatible with most automated mounting and position sensing equipment.

The **OP525** devices have a 1.8mm domed lens and viewing acceptance angle of 25°C with higher collector current gains due to the lenses on package. The **OP525** and **OP525DA** have a water clear lens that senses ambient light to higher wavelengths for applications from 450nm to 1120nm. The **OP525F** has a black domed lens to reduce ambient light noise.

The **OP525** series are tested using infrared light for close correlation with Optek GaAs and GaAIAs emitters. Photo darlington devices are normally used in application where light signals are low and more current gain is needed than is possible with phototransistors.

Applications:

- Non-contact position sensing
- Datum detection
- Machine automation
- Optical encoders
- Reflective and transmissive sensors

Ordering Information

Part Number	Sensor	Viewing Angle
OP525	Phototransistor	25°
OP525DA	Photo Darlington	25°
OP525F	Phototransistor	25°

$\lambda_{0.5}$	Spectral Bandwidth OP525F	750	-	1100	nm	-

Notes:

- Solder time less than 5 seconds at temperature extreme.
- Derate linearly at 1.33 mW/° C above 25° C.
- Light source is an unfiltered GaAs LED with a peak emission wavelength of 935 nm and a radiometric intensity level which varies less than 10% over the entire lens surface of the phototransistor being tested.
- To calculate typical collector dark current in μA , use the formula $I_{CEO} = 10^{(0.04 t - 3)}$, where T_A is the ambient temperature in ° C.
