POB-Technology

Dual-Pack

Price: €379.00

Description

The **Dual-Pack** is a set of robotics parts to build a full and high performance robot.

The **Dual-Pack** is made of a **Dual-POB** (detailled description here), a **POB-Eye** color camera (detailled description here), a graphical screen POB-LCD and the connectors board Dual-I/O .

Applications

The two parts **Dual-POB** and **POB-Eye** are both programmable separately and usable together or separately. **POB** has developed a firmware to allow the user to use the **Dual-POB** as a super I/O controller for the **POB-Eye** camera, and conversely tu use the **POB-Eye** camera as a device of the **Dual-POB** to do pattern recognition. The display is managed by the **POB-Eye**.

Technical features

For the technical features, please read the separate web pages of the products:

- Dual-POB

- [POB-Eye](#)
- [POB-LCD](#)
- [Dual-I/O](#)
