

## Description

The Redington Model 33 line of LCD counters provides a large display, 7 mm high figures, in an eight digit counter. The counters are available in a variety of mountings: 2-hole rectangular, 3-hole round, flush-round and flush-rectangular. Voltage operating ranges are 10277 VDC AND 20-277VAC. All models are totally sealed from moisture and dirt and conform to NEMA $4 \& 4 X$ specifications when mounted with the optional gasket. Their rugged construction makes them ideal replacements for current electromechanical counters. Units have polarized LCD for high visibility in sunlight.

## Features

Options

- AC or DC voltage input in the same unit
- Totally sealed from moisture and dirt
- Always on display
- Compact depth
- Clip retainer mount or screws (supplied)
- Custom logos and bezels
- Terminations
- Remote reset - dry contact with 6 " wire leads
- Gaskets

5003-002S gasket for 2-hole mount 5003-003S gasket for flush-rectangular mount
5003-004S gasket for flush-round mount
5003-005S gasket for 3-hole round mount

* Vih is the input high voltage. This is specified as the minimum input voltage that the Model 33 will recognize as a high level. Vil is the input low voltage. This is specified as the maximum input voltage that the Model 33 will recognize as a low level.

Note: When interfacing the Model 33 with a Solid State Relay or AC Sensor, the leakage current needs to be considered. Contact the factory or see the application note at www.redingtoncounters.com for further information.
