# POB-Technology

Dual-I/O

Price: €39.00

Description

The **Dual-I/O** is a connectors board for the **Dual-POB** which can be used to easily connect your sensors and actuators with a screwdriver. **POB** has kept the joystick of all the POB robots to enhance interactivity between the robot and the user.

The **Dual-I/O** is connected to the **Dual-POB** with a ribbon cable. It is very useful to connect and disconnect your **Dual-POB** from the robot and to use it on an other robot or for an other course.
