

ELIMINATES THE NEED TO CHOOSE

⊕ Cross Recess

Industry standard - no searching for a driver bit. Swift & easy bit location.

Part Thread

Eliminates 'jacking' where a full threaded screw tends to pull apart the jointed material.

Finish

Available ex-stock in Net-Coat™ yellow plated, other coatings available to order.

TS Thread (Exaggerated)

Utilises benefits of both twin and single thread on the same screw.

Single Coarse Thread

Drives in without reaming a hole in the material, enabling a swift efficient fix with high pullout retention.

Twin Thread

Penetrates the dense surface and balances the screw with two points of pickup that start right at the tip of the screw.

Ribs

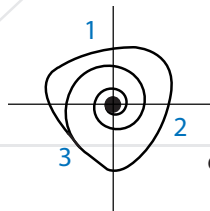

Cutting edge ribs ream and self - countersink the screw.

Collar

Gives strength to the most vulnerable point of the screw.

Tri - Lock™ Threadform

Three flats on thread means less surface contact between screw and material when driven in - which means less battery wear, easier to insert and the screw will not work loose over time as the material flexes under use.

CPT™ Hardened

Permeated case with through hardening allows the perfect balance between core ductility and surface toughness - with the strength of a high tensile bolt the screw will not snap.

Masonry

No plastic plug required, just a pilot hole 1mm less than the screw. (i.e. - 6mm Screw-Tite® = 5mm hole)

Product Code	Dia (mm)	Length (mm)	Box Qty
TFST03012	3	12	200
TFST03016	3	16	200
TFST03516	3.5	16	200

THE ULTIMATE ALL PURPOSE SCREW

SCREWS DESIGNED BY THE SPECIALIST FOR THE SPECIALIST

Screw-Tite®

THE ONLY SCREW YOU'LL EVER NEED!

Screw-Tite®

The Ultimate Multi Purpose Screw that ends the need to choose.

It's revolutionary Tri-Lock™ TS Threadform uniquely incorporates a single and twin thread on the screw, enabling Screw-Tite® to perform in all possible applications.

Independent tests show without doubt that Screw-Tite®'s insertion speed is twice as fast and in certain circumstances, up to three times faster than other quality screws.

Don't get left behind!
