

SLx Gold Signal Amplifiers

The SLx range of Gold Signal aerial amplifiers are designed to improve picture and sound quality by amplifying weak UHF, VHF, DAB and FM radio signals. Can also be used to distribute VCR, Digital TV and Sky/Sky+ signals without loss of reception.

- Unlike standard boosters SLx Gold's flat gain response across full frequency spectrum ensures optimum digital reception
- Dedicated inputs for UHF and FM/DAB
- Side mounted terminals provide easy cable management
- Infra-red by-pass for digilinks
- Surge Protection
- Full VHF compatibility for TV and FM/DAB including Ireland
- Integrated by-pass to control Digital satellite receivers from a second TV
