

4-Zone Compact Wireless Alarm System - 434MHz

The 3400 is a low-cost, wire-free alarm system with a superbly compact control panel. It features 4 zones with the zone 4 LED also reporting signal level quality. Day to day operation is performed using the handy remote control included or via the control panel keypad. It is semi-programmable and features a low cost external siren with cable that requires connection to the control panel. All detectors are wire free including the handy remote control which operates through walls and ceilings. The system is expandable and a low battery within any detector is reported on the control panel by alternate flashing of the low bat LED and the Zone LED.

- Part-arm facility
- 4 Zones including entry/exit zone and panic/tamper zone
- Wireless anti-scan function
- Low battery indication per zone
- Built-in panic button
- 110dB siren
- Mains power failure indicator
- Battery back-up facility (battery included)

Optional accessories are also available including the extender unit which is suitable for outbuildings
