

# THURLBY THANDAR INSTRUMENTS LCR400

## Precision LCR bridge with limits comparator

- ▶ 0.1% measurement accuracy
- Test frequencies up to 10kHz
- Automatic component recognition
- Built-in 4 terminal component fixture
- Dual 5 digit high brightness displays
- Limits comparator, multiple pass and fail bins
- ▶ RS-232 interface for PC connectivity
- Optional SMD tweezers, Kelvin Clip leads, Windows logging software

## LCR400 low-cost precision LCR bridge

## Bridging the price-performance gap

Anyone who has tried to purchase a high accuracy meter for LCR measurement at a reasonable cost will have discovered the problem.

There are plenty of low cost hand-held LCR meters available, but the accuracy is poor and the facilities very limited.

There are plenty of high performance LCR bridges available, but the costs are typically an order of magnitude greater than the simple hand-held units.

The LCR400 bridges the gap. It provides the performance and facilities required for precision component measurement at a price not far above that of a hand-held unit.

The LCR400 is a low-cost precision LCR bridge intended for use within component inspection, laboratories and production facilities. The basic measurement accuracy is 0.1% and the maximum measurement frequency is 10kHz.

#### Designed for serious use

The LCR400 is housed in a rugged casing of sufficient weight to stay where it is put.

It incorporates a high quality four terminal test fixture with adaptors for axial or radial components. The fixture is unobstructed for ease of use with bandoliers.

## Lower cost through innovative design

The LCR400 sets a new price standard for a high performance LCR bridge. Advanced design techniques utilising the latest component technologies have made this possible.

Now a precision component measurement system is within the budget of every area of a company from the laboratory through to goods-inward inspection.

#### Non-volatile set-ups

As well as remembering the last used set-up, the LCR400 incorporates non-volatile memory for up to nine complete instrument set-ups for rapid recall.

## Automated results logging

An RS-232 interface is provided for linking to a PC. Optional Windows based software (LCR-PCLink) is available which allows results to be logged onto a PC (save to a file and to the screen) and enables instrument set-ups to be saved and restored.

1	PC Link Ab			1	TT

## Full component sorting

The LCR400 provides comprehensive facilities for sorting components into 'Bins' according to value. The binning parameters can be defined from the keyboard of from a PC via the RS-232 interface.

Up to eight pass bins and two fail bins can be defined. Bin limits can be sequential or overlapping from a single nominal or can be based around different nominals.

#### High quality test fixture

The LCR400 has a built-in four terminal sprung-jaw test fixture with pillar adaptors making it suitable for use with both axial and radial components.

Optional adaptors are also available to allow connection to external test fixtures.

### Surface mount tweezers

High quality four terminal SMD tweezers are available as an option for measuring surface mount components.

The tweezers connect directly into the built-in test fixture of the LCR400. Four terminal connection is made at the base of the gold plated jaws only a few millimetres from the tip.

#### Alternative connection methods

An adaptor is available which converts the built-in test fixture into a set of four BNC sockets. This can be used to connect the LCR400 to external test fixtures or test lead sets. TTi also offers a high quality Kelvin Clip test lead set suitable for precision four terminal measurements.

#### MEASUREMENT FUNCTIONS GENERAL Parameters Measured: R, L, C, D, & Q. Keyboard: Manual or automatic selection of R, L or C. Non-volatile memory: Parameter Selection: Series or parallel equivalent circuit. Prevents autoranging when changing Measurement Modes: Input Voltage: Range Hold: components. Zero Function: Nulls out up to 100pF at test fixture Measurement Freq.: Displayed Functions: Selectable as 100Hz/120Hz, 1kHz, 10kHz. R+Q, L+Q, C+D, C+R. Safety: EMC: Size MEASURING RANGES Weight: Resistance: $0.1m\Omega$ to $990M\Omega$ 0.001H to 9900H 0.001pF to 99000µF Inductance: Capacitance: D: 0.001 to 999 Q 0.001 to 999 BNC Adaptor: 100Hz 1kHz 10kHz Accuracy Limits: 0.1% ± 1 digit 2Ω-1ΜΩ 2Ω-500kΩ 2Ω-50kΩ R 0.5% ± 1 digit 0.4Ω-5ΜΩ 0.1Ω-20ΜΩ 0.4Ω-2ΜΩ 0.1Ω-10ΜΩ 0.4Ω-200kΩ 0.1Ω-500kΩ 2%±1 digit $0.1\% \pm 1$ digit $0.5\% \pm 1$ digit $2\% \pm 1$ digit 0.4mH-50H 80µH-250H 20µH-1000H 40µH-5H 8µH-25H 4mH-500H LCR PC-Link L 0.8mH-2500H 0.2mH-9900H 2µH-100H 100pF-10μF 20pF-50μF 5pF-200μF 0.1% ± 1 digit 0.5% ± 1 digit 2% ± 1 digit 2% ± 1 digit 500pF-2000µF 10nF-1000µF 1nF-100uF С 200pF-500µF 50pF-2000µF (R accuracies apply for Q<0.1. L accuracies apply for Q>10. C accuracies apply for D<0.1 and after Null). LIMITS COMPARATOR Multiple Upper and Lower limits can be set from keyboard or from RS-232 interface Up to 8 Pass bins can be defined plus Fail on minor parameter and general Fail. Limits Set-up: Binning: COMPONENT CONNECTION Component Connection: 4-terminal connection via internal fixture for 4-terminal connection via internal fixture for both radial and axial components. External 4-terminal connection via adaptor. Sprung jaws for vertical lead insertion. Plug-in sliding pillars for horizontal lead insertion. Switchable 2V polarising voltage. External bias up to 50V can be applied. Can withstand charged capacitors up to 50V and up to 1 Joule of total energy. Internal Fixture: Bias Voltage: Protection: DISPLAY Dual 5-digit 0.56" LEDs. Display Type: LED annunciators for all functions and mea-Annunciators: surement units Displayed Functions: R+Q, L+Q, C+D, C+R, PASS/FAIL, Bin No. DIGITAL INTERFACE Interface Type: Interface Function: RS-232 via 9 pin D connector, 9600 baud. Full command and readback capability.

Designed and manufactured in Europe Thurlby Thandar Instruments Ltd. Glebe Road, Huntingdon. Cambs. PE29 7DR U.K. Tel: +44 (0)1480 412451 Fax: +44 (0)1480 450409 Email: sales@tti-test.com Web: www.tti-test.com

 Non-volatile memory:
 Up to 9 complete set-ups.

 Input Voltage:
 230V or 115V ±14%, 50/60Hz, internally adjustable, 25VA max. Installation Category II.

 Temperature Range:
 +5°C to 40°C oprating 20 - 80% RH, 40°C to 70°C storage.

 Safety:
 Complies with EN61010-1.

 EMC:
 Complies with EN61326.

 Size:
 360 x 240 x 95 mm including feet.

 Weight:
 2.9kg.

 OPTIONAL ACCESSORIES

 SMD Tweezers:
 Four terminal tweezers for measuring surface mount components. Connects directly into standard test fixture.

 BNC Adaptor:
 Plugs into the standard component fixture to convert it into a set of four BNC to BNC teads.

 Kelvin Clip Leads:
 High quality Kelvin Clip test lead set terminating in BNC plugs (requires BNC adaptor).

 LCR PC-Link:
 Windows based software which uses the RS232 interface to provide results logging and to store/restore instrument set-ups.

Full numeric keyboard.
