## ELECTROSTATIC BUBBLE SHIELDING BAGS

Code BA9...

Electrostatic bubble shielding bags are made from a three layer material consisting of standard pink antistatic bubble material sandwiched between a layer of metallised film and a layer of pink polyethylene film. This material offers excellent ESD protection combining the 'Faraday Cage' effect with an air gap. It also offers good mechanical protection and being partially transparent permits easy identification of contents. Its heavy-duty construction makes it suitable for re-use.

PROPERTIES	UNIT	TYPICAL VALUES	TEST METHODS
Surface Resistivity:

Other properties: Free from amine/amides/heavy metals. Polycarbonate compatible.

Physical dimensions: Shielding bubble bags are available in a range of sizes from 4" x 6" up to 24" x 24" with most sizes having a 1" flap. The material is also available in rolls 1.5 metre wide by 100 metre long.

Dimensional tolerances:

Internal width	- 0 + 10 mm
Internal depth	- 0 + 15 mm
Flap	-5 + 5 mm
Seal width	6mm typical
