FLOOR MARKING TAPE

Code C3000 FEC Part No 681192

Description:

This self-adhesive tape is suitable for marking the boundaries of ESD Protected Areas. It adheres very well to synthetic floor tiles such as PVC tiles. C3000 tape will also adhere to concrete floors but it will usually last only approximately three to six months depending on traffic then require replacement.

The tape is yellow and printed in black with the ESD logo as per IEC 61340-5 and the text 'ESD Protected Area'.

The carrier tape is laminated with a clear film to protect the print. The tape is not antistatic but we feel that it need not be, as it will usually be considered to be outside the EPA.

The tape is highly visible and is a very effective awareness-raising aid.

Physical dimensions

Width: 75mm
Length: 33m
Repeat: 46cm
Core: 75mm (3")
