

Long Nitrosolve™ Z51G

Chemical resistance

For solvent handling

This nitrile glove provides **protection** against many solvents and oil based chemicals.

Nitrile gloves are ideal for a range of **industrial environments**. The Z51G is a longer, elbow length gauntlet style glove with flock lining for comfort in extended use.

Suggested ideal applications

automotive industry, petrochemicals, chemical industry, printing

4102

CE 0086

Long Nitrosolve™ Z51G

Glove specifications

Glove reference	Material/ lining	Finish	Colour	Size	Average length (mm)	Average palm thickness (mm) (Double wall)	Performance Level EN 420:1994	Performance Level EN 388:1994 Mechanical hazards	Performance Level EN 374:1994 Chemical hazards	Performance Level EN 374:1994 Micro-organism hazards
Long Nitrosolve™ Z51G	Flocked nitrile	Raised grip pattern	Green	8 (M), 9 (L), 10 (XL)	435	1.12	Dexterity: 5	4102		

Key features and benefits

- Nitrile rubber
- Flocked
- Heavy duty construction
- Long elbow length cuff
- Manufactured using a quality assurance system under the control of the BSI
- CE Complex design
- Very good abrasion resistance and protection from oils based chemicals and solvents
- For greater comfort
- Durable and hard wearing
- Extra protection

Key to EN Scores

Where 0 indicates test performance below level 1
Where an X appears in the sequence, no test was carried out

EN 388:1994	Resistance to abrasion	0-4
	Blade cut resistance	0-5
	Tear resistance	0-4
	Puncture resistance	0-4

These gloves comply with the main requirements of the European Personal Protective Equipment Directive (Directive 89/686/ECC) dated 21st December 1989. They are subjected to CE-standard examinations, which are carried out by a notified laboratory, BSI, which certifies that these gloves comply with the applicable EN standards, and attests to the performance standards obtained during testing.
