

E-blocks SD/MMC card reader

The main function of this E-block is to add the capabilities of storing and retrieving large amounts of data for use elsewhere in an electronic system. Use of the MMC card reader allows users to add up to 1GB of additional memory to an electronic system. This E-blocks can be added to any microcontroller that has a USART interface.

Key Features

- Provides large memory storage capability
- PC compatible storage
- SPI serial MMC interface
