

Product Data Sheet

LF 125kHz 20mm Clear Disk RFID Tag

Overview

A low frequency (LF) and very economical 125kHz passive RFID tag. Contactless power supply and very low power.

This passive tag offers good performance in the presence of metals and liquids and other non-conducting materials, allowing tag operation in very difficult or harsh environments.

LF systems are widely used for a wide variety of data collection and identification applications.

Small disk shaped tag can be applied directly to many products, fitted into enclosures and labels and applied to many different types of asset.

Tag

RF Frequency

125kHz

Chip

Hitag-S

Memory
