

Product Data Sheet

UHF 868MHz Tag - Small Label

Overview

Ultra high frequency (UHF) RFID tag with an operational frequency of 860-960 MHz.

An industry approved global tag perfect for footwear, hang tags and item level applications.

Excellent close coupling performance, orientation-insensitive and optimised read distance for supply chain and point of sale.

Low energy consumption ideal for use with handheld readers.

Up to 512bit user memory, 64bit tag identifier (TID) including 32 bit unique serial number.

Applications

- Item Level Products
- Hang Tags
- Baggage Labels
