

## VEROBOARD

### **SINGLE SIDED, COPPER PRINTED CIRCUIT BOARDS, FULLY PIERCED WITH HOLES. ALSO KNOWN AS STRIPBOARD**

Veroboard is ideal for development and prototyping work, Veroboard is designed primarily for hard wiring of discrete components, typically in analogue circuits, but is equally useful where a number of common bus or signal lines are required. Veroboard is manufactured from copper clad laminated board which has been pierced with a grid of holes and machined to provide parallel tracks.

#### **Veroboard (stripboard) Features**

- Ideal for hard wiring or discrete components
- Range of standard sizes
- Choice of hole sizes and grid pitch

All boards are 1.6mm thick with copper thickness of 35um. Hole grid: 2.54 x 2.54 mm., hole diameter: 1.02 mm.

For Veroboard current carrying capacity details, please [here](#) for a download

A "Spot Face Cutter" can be used to break the tracks easily, Order Code: 22-0239
