## **3M** Scotch-Weld<sup>™</sup> Epoxy Adhesive DP-100 FR

| Technical Data                         |  |                             | December, 2009                              |
|--|--|-----------------------------|---|
| Product Description                    | 3M <sup>TM</sup> Scotch-Weld <sup>TM</sup> Epoxy Adhesive DP-100 FR is a two-part flame retardant (self-extinguishing) version of Scotch-Weld DP-100. It meets the UL94 V-O Burn Test requirements and has a work life of 4-8 minutes after mixing. It is ideal for many applications requiring a self-extinguishing structural epoxy adhesive system. |                             |   |
| Features                               | • Fast Cure  |                             |   |
|  | Cream Color  |                             |   |
|  | Easy Mixing  |                             |   |
|  | • Meets UL 94 V-O (File No. E61941)  |                             |   |
|  | • Passes 14 CFR 25.853 (60 Sec. Vertical Burn Test) <sup>1</sup>   |                             |   |
|  | • Does not contain brominated or antimony-based flame retardants.  |                             |   |
|  |  |                             |   |
| Typical Uncured<br>Physical Properties |  |                             |   |

### Typical Cured Properties

Note: The following technical information and data should be considered representative or typical only and should not be used for specification purposes.

#### Physical

| Color  | Cream <sup>9</sup>       |
|--|--------------------------|
| Shore D Hardness <sup>4</sup>                  | 87                       |
| Time to Handling Strength⁵                     | 10-20 min. @ 73°F (23°C) |
| Cure Time <sup>6</sup>                         | 24-48 hrs. @ 73°F (23°C) |
| Glass Transition Temperature <sup>7</sup> (Tg) | 142°F (61°C)             |
| Modulus of Elasticity <sup>8</sup>             | 650,000 psi              |

<sup>4</sup> ASTM D 2240.

<sup>5</sup>Time to develop 50 psi overlap shear properties.

<sup>6</sup>Time to develop maximum overlap shear properties.

<sup>7</sup>Determined using DSC and heating rate of 68°F (20°C) per minute.

<sup>8</sup>Determined using DMA.

°Color may vary from nearly white to yellow/amber. Adhesive performance is not affected by color variation.

### Handling/Application Directions for Use

### Information

For high strength structural bonds, paint, oxide films, oils, dust, mold release agents and all other surface contaminants must be completely removed. However, the amount of surface preparation necessary depends on the required bond strength and the environmental aging resistance desired by user. For specific surface preparations on some common substrates, see the section on surface preparation.

3M<sup>TM</sup> Scotch-Weld<sup>TM</sup> Epoxy Adhesive DP-100 FR is supplied in a dual syringe plastic duo-pak cartridge as part of the 3M<sup>TM</sup> EPX<sup>TM</sup> Applicator System. To use, simply insert the duo-pak cartridge into the EPX Applicator and start the plunger into the cylinders using light pressure on the trigger. Next, remove the duo-pak cartridge cap and expel a small amount of adhesive to be sure both sides of the duo-pak cartridge are flowing evenly and freely. If simultaneous mixing of Part A and Part B is desired, attach the EPX mixing nozzle to the duo-pak cartridge and begin dispensing the adhesive.

When mixing Part A and Part B manually, the components must be mixed in the ratio indicated in the Physical Uncured Properties section. Thorough mixing of the two components is required to obtain optimum properties.

Two-part mixing/proportioning/dispensing equipment is available for intermittent or production line use. These systems are ideal for line use because of their variable shot size and flow rate characteristics and are adaptable to most applications.

| Handling/Application<br>Information ( <i>continued</i> ) | Surface Preparation  |  |  |
|--|--|--|--|
|  | For high strength structural bonds, paint, oxide films, oils, dust, mold release agents<br>and all other surface contaminants must be completely removed. However, the<br>amount of surface preparation necessary depends on the required bond strength and<br>the environmental aging resistance desired by user. |  |  |
|  | The following cleaning methods are suggested for these common surfaces:  |  |  |
|  | Steel:   |  |  |
|  | <ol> <li>Wipe free of dust with oil-free solvent such as acetone, isopropyl or alcohol<br/>solvents.*</li> </ol>   |  |  |
|  | 2. Sandblast or abrade using clean fine grit abrasives.  |  |  |
|  | 3. Wipe again with solvent to remove loose particles.  |  |  |
|  | 4. If a primer is used, it should be applied within 4 hours after surface preparation.   |  |  |
|  | *When using solvents, extinguish all ignition sources, including pilot lights, and follow manufacturer's precautions and directions for use.   |  |  |
|  | Aluminum:  |  |  |
|  | <ol> <li>Alkaline Degrease: Oakite 164 solution (9-11 oz./gallon water) at 190°F (88°C)<br/>± 10°F (-13°C) for 10-20 minutes. Rinse immediately in large quantities of cold<br/>running water.</li> </ol>  |  |  |
|  | 2. Acid Etch: Place panels in the following solution for 10 minutes at $150^{\circ}F(66^{\circ}C) \pm 5^{\circ}F(-15^{\circ}C)$ .  |  |  |
|  | Sodium Dichromate<br>Sulfuric Acid, 66°Be<br>2024-T3 aluminum (dissolved)<br>Tap Water as needed to balance  | 4.1-4.9 oz./gallon<br>38.5-41.5 oz./gallon<br>0.2 oz./gallon minimum   |  |
|  | Note: Read and follow component recommendations prior to pre-  | suppliers environmental, health and safety eparing this etch solution. |  |
|  | 3. Rinse: Rinse panels in clean running  | g tap water.   |  |
|  | 4. Dry: Air dry 15 minutes; force dry 10 minutes at $190^{\circ}F(88^{\circ}C) \pm 10^{\circ}F(5^{\circ}C)$ .  |  |  |
|  | 5. If primer is to be used, it should be applied within 4 hours after surface preparation.   |  |  |
|  | Plastics/Rubber  |  |  |
|  | 1. Wipe with isopropyl alcohol.*   |  |  |
|  | 2. Abrade using fine grit abrasives.   |  |  |
|  | 3. Wipe with isopropyl alcohol.*   |  |  |
|  | *When using solvents, extinguish all ig follow manufacturer's precautions and  | nition sources, including pilot lights, and l directions for use.      |  |

| Characteristics                                 | The following product performance data were obtained in the 3M laboratory under the conditions specified. The following data show typical results obtained with the 3M <sup>TM</sup> Scotch-Weld <sup>TM</sup> Epoxy Adhesive DP-100 FR when applied to properly prepared substrates cured, and tested according to the specifications indicated. This data was generated using the 3M <sup>TM</sup> EPX <sup>TM</sup> Applicator System equipped with an EPX static mixer, according to manufacturer's directions. Thorough manual mixing should afford comparable results. |  |  |

|---|---|---|---------------------|--|--|
|   | 90° T-Peel <sup>10</sup> Adhesive   |   |                     |  |  |
|   | Aluminum, etched 2024 T-3 (.032")   | 17-20 mil bond line                         | 2 piw               |  |  |
|   | <sup>10</sup> T-peel (ASTM D 1876-61T)  |   |                     |  |  |
|   | T-Peel strengths were measured on 1" wide bonds at 73 minute. The substrates were 0.032" thick  | P°F (23°C). The testing jaw separation rate | e was 10 inches per |  |  |

With the exception of rate of strength build-up tests, all bonds were cured 7 days at 73°F (23°C)/50% relative humidity before testing or subjected to further conditioning or environmental aging.

### **Rate of Strength Build-Up**

Aluminum, Overlap Shear (7 mil Bond line) Bonds Tested at 73°F (23°C)

Time (substrate bonding to time tested)

| 5 minutes  | 0 psi    |
|------------|----------|
| 10 minutes | 450 psi  |
| 20 hours   | 1250 psi |
| 4 minutes  | 1650 psi |
| 24 hours   | 2200 psi |

Storage

Store product at 60-80°F (16-27°C) for maximum storage life. Higher temperatures reduce normal storage life. Lower temperatures may cause increased viscosity of a temporary nature. Rotate stock on a "first in-first out" basis.

Shelf Life

When stored in the original, unopened container at the storage conditions suggested, this product has a shelf life of 15 months.
