

New junction boxes with 1/4 turn screws

1SLC806001B0201

*Faster
installation
for a full
protection*

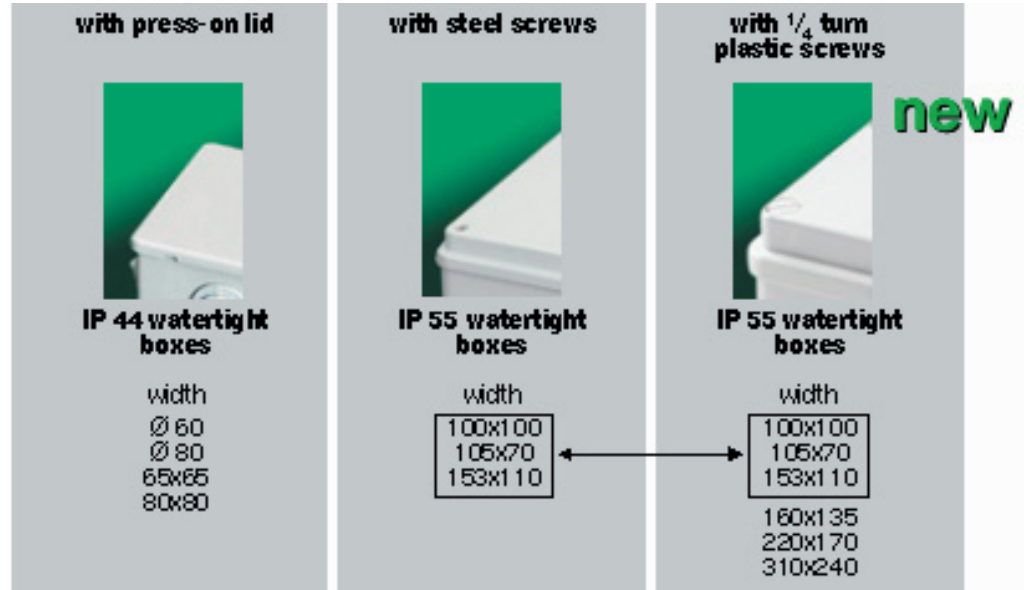

The high level of reliability which characterises the various models of boxes supplied by ABB SACE perfectly meets the need for watertight enclosures which guarantee complete protection in any situation where wall-mounted junction boxes are required.

To further enhance the existing range, ABB SACE has introduced the new IP55 watertight boxes with 1/4 turn plastic closing screws. Installation is much quicker thanks to the new captive screws, which make the various opening/closing operations simpler and faster. All of the watertight boxes with 1/4 turn screws also have a hinged cover and new laser markings indicating the IP protection rating on the product.

ABB

ABB SACE watertight boxes with IP55 protection rating are made of self-extinguishing thermoplastic resistant to abnormal heat and fire up to 960°C (glow wire test) according to IEC 60695-2-1 standards. The range is extremely versatile: there are versions with smooth sides or with cable holder inlets, with opaque covers (grey RAL 7035) or transparent ones, high or low. The base of the box has special seats for securing terminal boards and various accessories. The boxes consist of a patented cover produced with the seal during a single moulding stage.

All of the junction boxes have obtained the IMQ approval mark and are made in conformity with CEI 23-48 and IEC 60670 standards.

Code	Internal dimensions WxHxD (mm)	Description	Box/pack no items
Boxes IP44			
00 800	$\varnothing 60$ - H 35	With cable glands and press-on lid	240/240
