UNDERWRITERS LABORATORIES STANDARD NO. UL 486A 3M FILE NO. E23438

CANADIAN STANDARDS ASSOCIATION STANDARD NO. C22.2 NO. 0. 65 3M FILE NO. LR22190

#### **Specifications**

Wire Size: See Table Above

Barrel Seam: Brazed

Max. Voltage Rating: 600 V Building Wire 1000 V Signs, Fixtures

and Luminaires

Max. Operating Temp.: 221°F (105°C) Max. Current: Same as Wire Insulator Material: Adhesive-lined Polyolefin, TMW

Terminal Material: ETP Copper

Terminal Plating: Tin

#### **Installation Information**

#### riangle warning

Turn power off before installing or removing terminal. All electrical work should be done according to appropriate electrical codes.

UL Listed and CSA Certified for use on stranded copper (AWG) wire only.

Strip away the end 3/8 inch of wire insulation.

Make the crimp in the proper station of a recommended 3M<sup>™</sup> crimp tool: TH-440, TH-450 (scissor style) hand tools.

Barrel Crimp (Electrical)

Shrink tubing using a heat gun. Heat until tubing is completely shrunk and adhesive protrudes slightly from the tubing.

#### **Engineering Specification**

Crimp-type terminals shall, electrically and mechanically, connect to a pre-stripped end of a stranded copper wire: and have a flat tongue portion with a central opening for mounting around a screw or stud.

The terminal line shall offer tongue variations in hole (stud) size (6, 8 10, etc.) and configuration (ring, fork, block fork, flanged block fork, locking fork, etc.): and barrel variations in wire (AWG) size (22-18, 16-14, 12-10, etc.) and construction (non-insulated brazed seam, vinyl insulated butted seam, nylon insulated with insulation grip, etc.). The terminal line shall have regulatory agency coverage (UL Listing, CSA Certification). The terminal tongue shall be marked with the wire range and manufacturer's symbol  $(\uparrow)$ .

The heat shrink-insulated, brazed seam ring tongue terminal shall be tin-plated, annealed copper, with the tongue having a specified stud slot (size 6 thru 3/8") and a brazed seam barrel covered by an adhesive-lined heat shrink sleeve, color coded and sized for a specified (AWG) wire range (22-18, 16-14, 12-10.).

Heat shrink terminals shall be UL Listed and CSA Certified for 600 Volts maximum building wire: 1000 Volts maximum in signs, fixtures and luminaries and have a maximum operating temperature of 221°F  $(105^{\circ}C)$ .
