

# New 15x10 BestCap® – BZ084B103ZNB

## PRELIMINARY SPEC

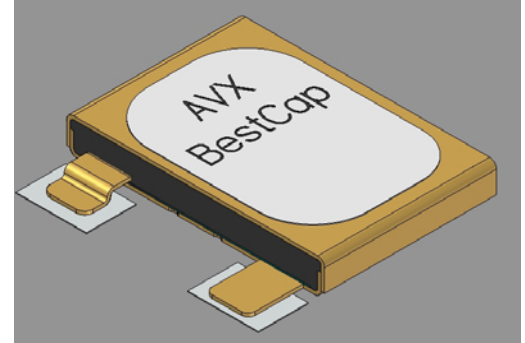

### New Smaller Footprint BestCap®

The BestCap® series of electrochemical supercapacitors offer excellent high power pulse characteristics based upon the combination of very high capacitance and ultra low ESR in the milliohm region.

Based on a unique patented aqueous chemistry and an innovative design, the system offers high capacitance, even with short pulse duration regimes such as in GSM, GPRS and Edge systems.

Used in conjunction with battery packs, BestCap® improves the voltage performance for high current pulses, resulting in higher PA efficiency and longer battery talk-time. BestCap® can also be used to boost instantaneous power availability in non-battery electronic applications where low level constant currents need to be supplemented by high current pulses.

### Characteristics

AVX Catalog Part Number:	BZ084B103ZNB
Part Size (mm):	15 x 10 x 2.1*
Temperature Range:	-20°C to 70°C
Rated Voltage:	4.5 V
Capacitance (+80%/-20%):	10 mF
Leakage Current:	5 $\mu$ A Max
ESR (1 kHz, +20%/-50%):	680 m $\Omega$

\* - 2.2mm Max Height

### Other Applications

RF Modems

Mainframe Computer Decoupling

Memory Back-up

Hybrid Battery Packs

Audio System “Base Line Stiffeners”

Camera Flash Systems

UPS

Switch Mode Power Supplies

Wireless Alarm Systems

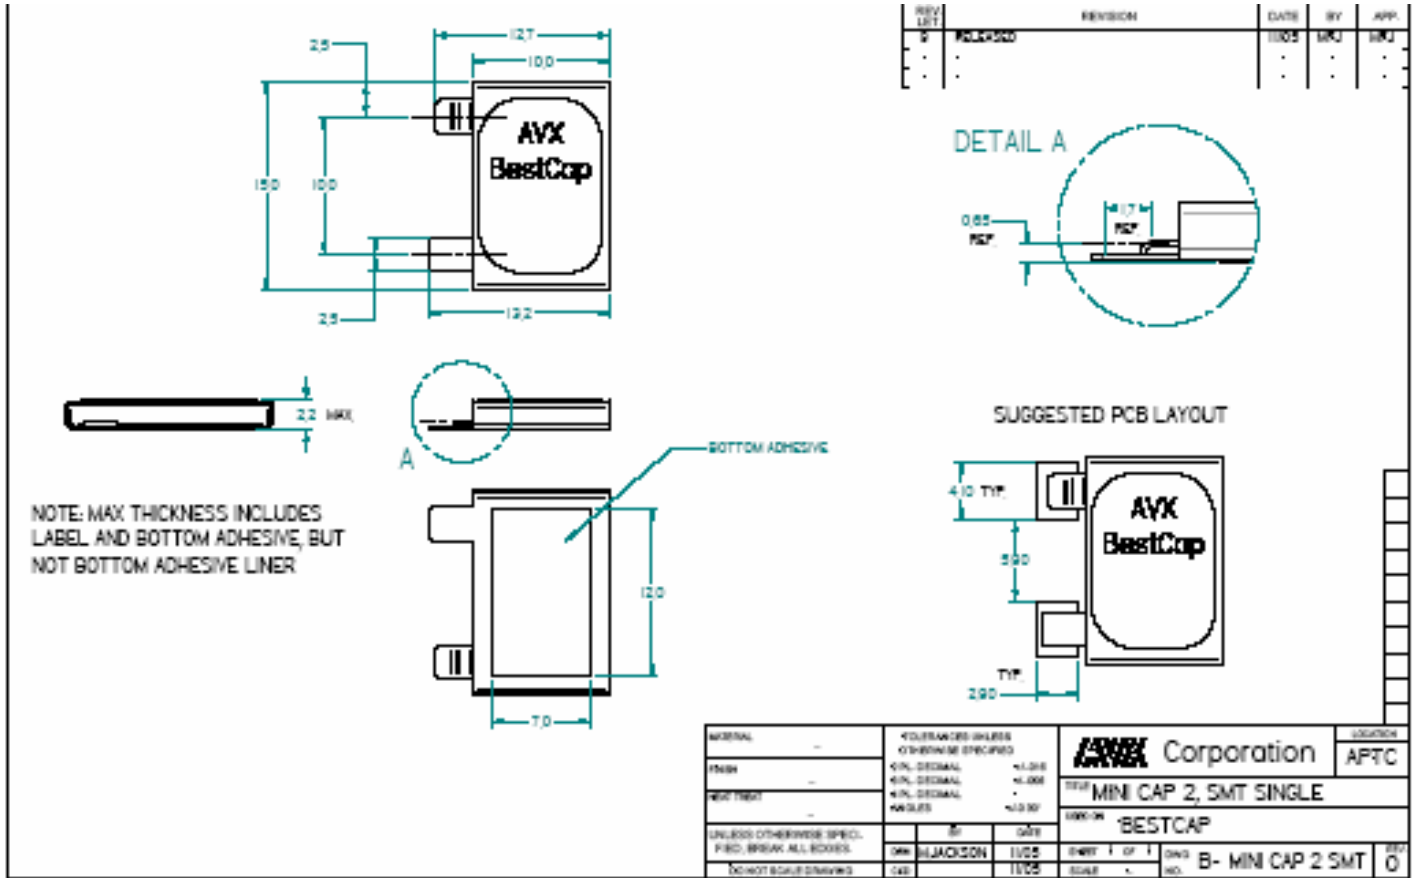

Products / Systems based on GSM, DSC1800, PCS, DECT...

# New 15x10 BestCap® – BZ084B103ZNB

## PRELIMINARY SPEC

### Suggested PCB Layout

NOTE: MAX THICKNESS INCLUDES LABEL AND BOTTOM ADHESIVE, BUT NOT BOTTOM ADHESIVE LINER
